

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE BY THE KEEPER OF COINS.

THE present volume of the Catalogue of the Greek Coins in the British Museum (the twenty-third of the series begun in 1873) describes the coinage of Parthia.

The size of the coins is given in inches and tenths, and the weight in English grains. Tables for converting grains into grammes and inches into millimètres, as well as into the measures of Mionnet's scale, are placed at the end of the volume. A map has been prefixed showing the Empire of Parthia at its greatest extent.

Besides the usual indexes of types, symbols, &c., this volume contains the following Tables:—A. List of Parthian kings, with dates. B. List of the regal titles found on Parthian coins. C. The Parthian months. D. Years of the Seleucid Era with the corresponding years of the Christian Era.

The whole work has been written by Mr. Warwick Wroth, the Senior Assistant in the Department of Coins and Medals. I have carefully read the proof sheets, and have (with the assistance of Mr. G. F. Hill) compared the coins with the descriptions in the text.

MAP OF THE PARTHIAN EMPIRE.

SUCCESSION OF THE PARTHIAN KINGS.

INTRODUCTION.

§ 1. PARTHIAN NUMISMATICS.

THE coinage of the Kings of Parthia—a very extensive series forming the currency of more than four hundred and fifty years—has repeatedly occupied the attention of numismatists.¹ One of the earliest workers was the celebrated Jean Vaillant (*b.* 1632, *d.* 1706) whose “*Arsacidarum Imperium, sive regum Parthorum historia ad fidem numismatum accommodata*,” was published posthumously in 1725. Vaillant discussed the Arsacid coinage with much historical learning, but his erroneous supposition about the era employed led to an entire misconception as to the main outlines of the numismatic arrangement. Eckhel, who had before him the researches of Froelich and Pellerin, was able in the third volume of his *Doctrina* (1794) to improve greatly upon the attributions of Vaillant, and paved the way for the meritorious investigations of Visconti, Charles Lenormant, Bartholomaei (1848), and Lindsay (1853).

The three treatises now most commonly consulted by numismatists are, probably, the *Mémoires* of Longpérier (1853), the *Monnaies des Rois Parthes* of Prokesch-Osten (1874-1875), and

¹ For a bibliography, see Markoff, *Catalogue des Monnaies arsacides* (Institut des Langues orientales). St. Petersburg, 1889, p. III. f.

(especially) the *Parthian Coinage* of Professor Percy Gardner (1877). Longpérier's book deals only with a portion of the Arsacid series, but contains some valuable historical dissertations and a notice of many unpublished tetradrachms: the engraved plates (not published until 1882), display the series in a very probable and carefully considered sequence, which does not greatly differ from the order determined on by Gardner. Prokesch-Osten's book describes the coins in his own fine collection, now in the Berlin Museum. It is an indispensable catalogue, though printed (and possibly compiled) in the most careless fashion. Mr. Gardner's work is distinguished from the publications of his illustrious predecessors by the excellence of its plates and its clearness of arrangement, and is also valuable for the sober judgment brought to bear upon the numismatic and historical evidence, which, unfortunately, is seldom of a very satisfactory and decisive kind.

Rawlinson's *Sixth Oriental Monarchy* (1873), and A. von Gutschmid's *Geschichte Irans* (1888), the two chief modern histories of Parthia, are well known. Rawlinson's is a painstaking and very readable account of Parthian history and geography. Gutschmid's treatise is highly-condensed, but none the less a most informing work. It abounds in brilliant—if often over-bold—hypotheses and combinations, and great use is made of the numismatic material published by Gardner. It is regrettable, however, that Gutschmid knew the coins only from books. Thus, on the one hand, he is wont to treat some attributions as far more certain than even numismatists would claim them to be, while, on the other, he sometimes rejects well-established attributions on what, to a numismatist, will seem arbitrary grounds and without sufficiently considering that one change (in a regal series) involves another, and often many others.

During the twenty-five years that have elapsed since the appear-

ance of Gardner's work, very large additions from the Cunningham, India Office, and other collections have been made to the series of Parthian coins in the British Museum, and at least one private collection, that of Ritter A. von Petrowicz, has grown to be of great importance.¹ But little has been written on Parthian numismatics,² with the important exception of Markoff's *Coins of the Arsacidae*, St. Petersburg, 1892 (text in Russian), in which, as also in Mr. Rapson's able review of the work (*Num. Chron.*, 1893, p. 203 f.), some new coins of the highest importance have been made known. These specimens show us, for instance, that the *tetradrachm* was a more prominent denomination in the early coinage than was previously suspected. They show us also that the Parthian mints were for a time largely under the influence of Greek—especially Seleucid—models. This influence is seen not

¹ Col. Allotte de la Fuye, of Versailles, has also a collection of the coins of Persis and Parthia. The Hunterian Museum at Glasgow contains a small but interesting series of Parthian coins, which I lately had the opportunity of examining, with the kind permission of Dr. Young, the Curator. These are, I believe, unpublished, but will be included in the third volume of Mr. George Macdonald's valuable catalogue of the collection. There are few tetradrachms, but a good series of the drachms of Mithradates III, Orodes I, and Phraates IV. Coins before the time of Mithradates II are almost wanting. Among the specimens may be noted a drachm of Mithradates II (helmeted class) of remarkably delicate work, especially on the obverse; some well-preserved examples of the later bronze coinage with dates; three specimens of the interesting bronze of Volagases III, with Pehlvi inscription, similar to Pl. xxv. 3—6; also a curious drachm resembling Artavasdes in portrait, but without obverse inscription, and with a helmet ornamented with pellets.

² Papers by Drouin and Th. Reinach, and Markoff's *Monnaies des Rois Parthes*, Paris, 1877, and his *Cat. des Monn. Arsacides*, St. Petersburg, 1889, should be mentioned. Some account of a correspondence between the late J. P. Six and Dr. Marquardt, the orientalist, on the rearrangement of Parthian coins, is given in Holwerda's *Levensbericht van Jan Pieter Six*, Amsterdam, 1902, p. 43 f. (reprinted from the *Jaarboek der Koninklijke Akademie van Wetenschappen*, 1902).

only in the adoption of Seleucid types and the Seleucid ("fillet") border, but also in the practice of directing the obverse head to the right instead of (as usual on Parthian coins) to the left. In studying these and other new coins with a view to the preparation of the British Museum *Catalogue*, I was myself led, though reluctantly, to the conclusion that not a few modifications must be made in the accepted arrangement of the coins as set forth in Gardner's work. The rectifications that seemed to be called for were principally in the period before Phraates IV, and in a paper "On the Re-arrangement of Parthian Coinage," published in the *Numismatic Chronicle* for 1900 (pp. 181—202), I ventured to criticize the existing arrangement and to indicate an alternative scheme. This, with various modifications and corrections, has been adopted in the present *Catalogue*.

Without, at this point, discussing minutiae of classification, it may be well to state that the divergence between Gardner's order and the order here adopted arises chiefly from the different views taken as to the supposed "fixed point" furnished by the drachm inscribed **EKP** (Pl. v. 7; p. 21, no. 10). Gardner, regarding this as a date, year '125' of Seleucid Era = B.C. 188/87, gave the coin to Phriapatius. But the subsequent discovery of the corresponding tetradrachm (Pl. v. 1, 2) dated **ΠΡ** ('188' = B.C. 125/24) proves that **EKP** is not a date of the Seleucid Era, and that tetradrachm and drachm (both of which bear the head of the same king) belong, not to Phriapatius, but to a later ruler, namely Artabanus I (B.C. 128/27—123). This single change necessitates other reattributions. Thus, the coins assigned by Gardner to Artabanus I ("II") must be given to some other king, and Phriapatius himself must be supplied with a new coinage. One of the most important changes is the attribution to Mithra-

**ARRANGEMENT
OF
THE COINS.**

dates II of the coins (Pl. vi.—viii.) hitherto generally assigned to Mithradates I. The grounds for this attribution and for other changes are discussed in § 2 of this Introduction, in which the history and numismatics of each king of Parthia are briefly treated.

The arrangement of the coinage of the Arsacids is well known to present exceptional difficulties. In the first place, the personal name of the sovereign is, as a rule, not recorded upon the coins, and there is indeed an almost pathetic meaning to the numismatist in Strabo's plain statement of fact: *'Αρσάκαι γὰρ καλοῦνται πάντες, ἰδίᾳ δὲ ὁ μὲν Ὀρώδης, ὁ δὲ Φραάτης, ὁ δ' ἄλλο τι.* But difficulties arise, perhaps even to a greater extent, from the fact that the literary material for reconstructing the history of Parthia is always scanty and frequently untrustworthy. Even after the researches of Rawlinson and Gutschmid we cannot compile with certainty the list of Parthian monarchs or determine with precision the limits of their reigns. Numismatists usually, and almost necessarily, assume that the early kings (before Phraates IV) followed one another in a continuous sequence, yet the possibility of contemporaneous reigns, of the rise of usurpers and rival sovereigns has constantly to be borne in mind, though it cannot be decisively proved from the coins, which, at this period, are devoid of dates. In the post-Phraatic period, we learn from the testimony of the dated coins that there were in fact several contemporaneous reigns, though they are unrecorded or only vaguely hinted at by our extant historians. The recovery of the *Parthica* of Apollodorus or of one of the other lost histories of Parthia would probably be of more real service to the numismatist than even the discovery of fresh coins.¹ In the present

¹ Careful analyses of any considerable hoards of Arsacid coins are greatly needed, and would certainly throw light on the general classification.

state of our knowledge, no classification, however plausible it may seem on purely numismatic grounds, can have any valid pretensions to finality. Chronological exactness is of the essence of the classification of a regal coinage, which cannot, of course, be profitably arranged (as a civic coinage may be) in extensive periods of fifty or even of a hundred years; yet in the Parthian series, more perhaps than in any other, a decision has constantly to be made upon insufficient and perhaps apparently contradictory data. The aim of the numismatist, therefore, must be the comparatively unambitious one of devising a scheme of arrangement which, however open at many points to objection, shall involve as few difficulties as possible.

§ 2. HISTORY AND NUMISMATICS OF PARTHIA.¹

The course of events that, about the middle of the third century B.C., led to the establishment of the Parthian kingdom is variously related. According to what may be regarded as the "official" tradition (Gutschmid, p. 30), Arsaces, the founder of the hereditary dynasty of Parthia, and his brother, Tiridates I, belonged to the race of the Parnian Dahae, and left their

¹ The chief modern authorities (much use of which has been made in this section) are:—G. Rawlinson, *Sixth Oriental Monarchy*, 1873: his *Parthia* (1893) is mainly an abridgment of this.—A. von Gutschmid, *Geschichte Irans*, Tübingen, 1888 (ed. Nöldeke). Gutschmid's article 'Persia' in the *Encyclopaedia Britannica*, 9th ed., is an abridged translation of this.—A useful compendium of Parthian history by F. Justi, in Geiger and Kuhn's *Grundriss der Iranischen Philologie*, vol. ii. p. 480 f.; cp. Geiger, *ib.* ii. p. 391 f., on the geography of Parthia; and K. Regling, "Zur historischen Geographie des mesopotamischen Parallelogramms," in Lehmann's *Beiträge zur alten Geschichte*, Leipzig, 1902, vol. i., p. 443 f.—The chapter on Parthia, in Mommsen's *Provinces of the Roman Empire*, vol. ii., chap. ix. (Eng. trans.). Cp. Bevan, *House of Seleucus*, 1902.

pasture-lands on the River Ochus to settle, farther west, in Seleucid territory. They rose (*circ.* B.C. 250) against the satrap of Antiochus II, Theos, and rescued 'Parthia'—the country lying to the south-east of the Caspian—from the Macedonian yoke, Arsaces becoming the first king.

Gutschmid and other recent writers doubt whether Arsaces was ever actually king of Parthia. His reign was, at any rate, very brief, and the practical foundation of the kingdom must be attributed to Tiridates I, who reigned for nearly forty years, probably from B.C. 248/47 to 211/10. He organized the army and the government, erected fortresses in strong positions, and built Dara as his capital.

ARSACES THE FOUNDER,
B.C. 250—248?

TIRIDATES I,
B.C. 248/47—211/10.

He further made the conquest of Hyrcania, the neighbour of Parthia on the west, and a country of extraordinary fertility. Like his immediate successors, Tiridates had to withstand a Seleucid invasion. He was attacked (not before B.C. 238) by Seleucus II, but was ultimately victorious.

"Arsaces, son of Tiridates I"—who by many modern writers has, on insufficient grounds,¹ been called Artabanus ("I")—succeeded his father. His opponent was Antiochus III, the Great, who in B.C. 209 appeared in Media with a large army. Antiochus reached Hecatompylos, and advanced into Hyrcania, where he captured the towns of Tambraca and Syriux. In the end peace was made, and Arsaces remained in possession of his dominions.

ARSACES,
SON OF
TIRIDATES I,
B.C. 210—191.

¹ See Gutschmid, p. 36, note 4; cp. p. 81; F. Cauer, in Pauly-Wissowa, *Real-Encyclop.*, s.v. "Artabanos, 4"; Ruehl's ed. of Justin, p. lxi.

Of the reign of Phriapatius, the next king, nothing is known, except (from the statement of Justin) that it
PHRIAPATIUS, lasted fifteen years. His eldest son, Phraates I,
B.C. 191—176. subdued the Mardi, and removed them to Charax,
PHRAATES I, a place in the neighbourhood of the Caspian
B.C. 176—171. Gates.¹ He died after a short reign. Passing
 over his sons, he had nominated as his successor his brother
 Mithradates I, a man conspicuous for ability and courage.

Under Mithradates I, Parthia became "the ruling power in
 Iran," and a comparatively small state expanded
MITHRA- into a great empire stretching from the Euphrates
DATES I, to the Hindoo Koosh (Paropamisus). (i.) Mithra-
B.C. 171—138. dates wrested two satrapies from Eukratides,
 king of Bactria. (ii.) He made war (after *circ.* B.C. 145?) upon
 Media Magna, and gained thereby a valuable province of great
 extent, over which Bacasis was set as governor. (iii.) His next
 acquisition was the province of Babylonia, 'the granary of the
 world,' and its great Hellenic city, Seleucia, on the Tigris. The
 Persians,² Medians, and other unwilling subjects of Parthia,
 invoked the aid of Demetrius II, Nikator, who, after a success
 in B.C. 140, was defeated in Media in the following year and

which he made subject, plundering its wealthy temples of Athena and Artemis (Nanaea).¹

Mithradates I probably died about B.C. 138, and was succeeded by his son Phraates II. In 130 Phraates lost Babylon and the Median capital Ecbatana to Antiochus VII, but in the following year Antiochus was himself defeated. Parthia from this time ceased to be troubled by invasions from Syria, but we now begin to hear much of a graver danger that threatened the empire—the incursions of the nomad Scythian tribes, who, pressed upon by other tribes, were driven south into Parthia and Bactria. Phraates was killed in battle by the Scythians *circ.* B.C. 128/27.²

His successor was his uncle Artabanus I, the younger brother of Phraates I and Mithradates I (sons of Phriapatus). He reigned for a few years only, and died from a wound received in an engagement with the Scythian Tochari, *circ.* B.C. 123.

If the coins described on p. 23, Pl. v. 9, 10, are rightly assigned to Himerus, they must, from the date on the drachm (B.C. 124/23), have been issued about this time. This Himerus (or Euhemerus) was a favourite of Phraates II, and had by him been appointed viceroy during his own absence in the north of the empire. Himerus treated Babylon and Seleucia with extreme severity, and made war upon Messene. Diodorus calls him king of Parthia.³

¹ On the coins of the Kamnaskires dynasty of Elymais, see Col. Allotte de La Fuye, *Rev. Num.*, 1902, p. 92 f.

² Gutschmid states that he conquered Margiana, but his only authority is the inscription ΜΑΡΓΙΑΝΗ on a drachm (*infra*, p. 40, note) which is attributed by Gardner to this king, but which seems to be better assigned to Artabanus II.

³ xxxiv. 21, Εὐήμερος ὁ τῶν Πάρθων βασιλεὺς.

Mithradates II, the son of Artabanus I, was, like his namesake, one of the great 'makers' of the Parthian empire. During a long reign, lasting probably from *circ.* B.C. 123—*circ.* 88, he earned by his achievements (says Justin) the surname of 'Magnus.'

**MITHRA-
DATES II,
B.C. 123—88.**

He checked the advance of the Scythians, engaged in many wars with his neighbours, and "added many peoples to the realm of Parthia" (Justin). In B.C. 94 Mithradates (like the majority of his successors) intervened in the affairs of Armenia, and placed Tigranes on the throne, receiving in return the cession of seventy Armenian valleys. In B.C. 92 he sent an embassy to Sulla, and Parthia was thus first brought into contact with Rome.

In attempting to ascertain the coinages of the kings whose history has now been slightly sketched, it will be best to proceed from what, undoubtedly, seems to be a fixed point in the series, namely the tetradrachm in Pl. v. 1 which is dated '188'=B.C. 125/24. This coin (if Gutschmid's chronology is correct) falls within the reign of Artabanus I, the successor of Phraates II. It is accompanied by the drachms and bronze (Pl. v. 3—8) which Gardner assigned

**COINAGE OF
ARTABANUS I.**

The drachm in Pl. v. 10 and the tetradrachm, Pl. v. 9, which probably belongs to it, may be assigned with confidence to *circ.* B.C. 124/23, because a similar drachm in the Berlin Museum (*infra*, p. 23, note 2) is inscribed with this date (year 189=B.C. 124/23).

COINS ATTRI-
BUTED TO
HIMERUS.

The year 124/23 covers the end of the reign of Artabanus I and the beginning of that of Mithradates II (according to Gutschmid's chronology). The attribution to Himerus, adopted by Prokesch and Gardner, though not free from difficulties, seems to be the most convenient.¹

The drachms in Pl. iv.² resemble those of Artabanus I (Pl. v. 3—7) in the arrangement of the reverse-legend in parallel lines and in the inscription of letters (the beginning of a name) on the obverse. They may therefore be assigned to Phraates II, the predecessor of Artabanus I.

COINS OF
PHRAATES II.

The predecessor of Phraates II was Mithradates I, the great Parthian king who was the first to extend materially the dominions of the Arsacid monarchs. It has been generally maintained, for reasons that seem to me rather plausible than convincing, that the principal currency of this ruler must be looked for in the familiar coins figured in Pl. vi.—viii.³ This attribution is adopted by Gardner; but if we apply what may be called the

The so-called
coinage of
Mithradates I
probably of
MITHRA-
DATES II.

¹ Gutschmid denies (rather arbitrarily) the correctness of the attribution. An alternative (suggested by me in *Num. Chron.*, 1900, p. 194), would be to regard the coins as the earliest issue of Mithradates II.

² Assigned by Gardner to Phraates I.

³ This discussion of the coins of Mithradates I and II is chiefly repeated from my article in *Num. Chron.* for 1900, p. 186 f.

"throne and omphalos" criterion to these coins, it can, I think, be shown that they have been incorrectly assigned. Mr. Gardner has pointed out that the whole Parthian series may be roughly divided into two great classes, the first consisting of the coins on which the bowman Arsaces of the reverse is found seated on the omphalos, the second of those on which he sits on the throne. Now we find that on the earliest (pre-Mithradatic) coins Arsaces sits on the omphalos. On the coins assigned by Gardner to Mithradates I (= Pl. vi.—viii. *infra*) he sits first on the omphalos and afterwards on the throne. But then—if my attributions are correct—his successor Phraates II (Pl. iv.) returns to the omphalos, and this seat is also occupied by Artabanus I (Pl. v.). The successor of Artabanus, however, and all the later Parthian kings revert to the throne. If, then, the "throne and omphalos" test is a valid one, it is obvious that the coins assigned to Mithradates I have been placed too early in the series. They must be placed after the last 'omphalos' coins, and introduce the long later series of 'throne' reverses. I propose, then, to assign them to Mithradates II, the son and successor of Artabanus I.

The second Mithradates, like the first, enjoyed a long and glorious reign, and may well have issued a varied and abundant coinage.

drachms, who is now promoted to a place on the tetradrachms (Pl. vi. 1, 2). This coinage, in fact, inaugurates a stereotyped Parthian, as opposed to a Seleucid, type of currency.¹

Although it is possible to indicate the coins that must have been struck during the period of Mithradates I, it seems to me difficult to determine what money bears his head and was issued under his immediate authority. I have arranged in three classes the coins that have a claim to belong to his time, Pl. ii., iii. It will be seen that the dated specimens (Pl. iii.

COINAGE OF
THE PERIOD OF
MITHRA-
DATES I.

¹ The title **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ** occurs for the first time in the Parthian series on some of the coins here referred to (p. 30 f., *infra*). It represents, as M. Drouin has remarked ("Sur l'origine du titre royal **ΒΑΣΙΛΕΥΣ ΒΑΣΙΛΕΩΝ**" in *La Gazette Numismatique*, Bruxelles, 1899), the *khshayathiya khshayathiyānam* (King of Kings) of the Achaemenid monarchs. Modern writers have often stated that the title was first assumed in Parthia by the victorious Mithradates I. This king may well have taken the title, but the proof that he did so rests solely on the attribution of these coins to his reign. If he was the first king to inscribe the title on his coins, it is remarkable that it should not appear on the coins of any of his successors (including even Mithradates II "Magnus") until the reign of Mithradates III, B.C. 57—54. Even if we assign the coins of 'Mithradates I' to Mithradates II, as I have proposed, there is still a considerable interval during which the title is in abeyance, at any rate, on the coins. The numismatic evidence (as I have already observed, *Num. Chron.*, 1900, p. 188) with regard to the first appearance of the title points rather to the time of the second than of the first Mithradates. For we find **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ** (i.) on the coins of Maues, the Saka dynast, *circ.* B.C. 120?, contemporary with Mithradates II; (ii.) on the coins of Tigranes the Great, of Armenia, who uses it on the money struck by him at Antioch, possibly from the year B.C. 83, when he became master of Syria, but more probably from B.C. 77 to 73: see G. Macdonald in *Num. Chron.*, 1902, p. 198. It is possible that Tigranes may have adopted the title as a kind of counterblast to the pretensions of Mithradates II, or, at any rate, in imitation of him. The disuse of the title by the immediate successors of Mithradates II may be due to the influence of Tigranes, who made conquests in Arsacid territory.

10—13; B.C. 140—138) prove that Class III¹ belongs to the closing years of the reign of Mithradates I, though the nature of the reverse-types and the flat fabric differentiate the coins of this class from the ordinary coins of Parthia. They bear the inscription ΒΑΣΙΛΕΥΣ ΜΕΓΑΛΟΥ ΑΡΣΑΚΟΥ found on Classes I and II, the tetradrachms having the addition of ΦΙΛΕΛΛΗΝΟΣ. The portrait-head probably represents the personage who appears on the obverses of Class I (cp. Pl. iii. 10, 11 with Pl. ii.), though this identification may, perhaps, be open to question.

With regard to the coins of Class I (Pl. ii.), there can be little doubt that Gardner is right in assigning them to the time of Mithradates I, relying for the attribution mainly on a comparison with the Bactrian coins of Eukratides, the contemporary of Mithradates I.² Mr. Gardner supposes them to have been struck in Bactria, or possibly in Media. The provenance of the coins is not, so far as I know, particularly suggestive of a Bactrian origin, and it is perhaps more likely that they were struck in Media Magna. No. 22 (p. 9) was found in the neighbourhood of Hamadan (the Median capital Ecbatana).

Gardner supposes the obverse head (Pl. ii.) to be that of a satrap, and not Mithradates I himself, whose head, according to him, is found on the well-known silver coins (Pl. vi.—viii.) that in this *Catalogue* are assigned to the second Mithradates. A clue should be furnished by the obols (Pl. ii. 3, 4), and by some of the bronze (Pl. ii. 5), which show on the reverse a bearded portrait-head in a helmet. Gardner regards this as the portrait of Mithradates I, represented as the suzerain of the

¹ Tetradrachms and drachms. There is no corresponding series of bronze.

² Cp. the Dioskuri type (Pl. ii. 6, 7) with Gardner, *Greek and Scythic Kings*, Pl. v. 8. Notice also the arrangement of the legend in semicircle and straight line, Pl. ii. 10.

satrap whose portrait—according to his view—occupies the *obverse*. This is a possible interpretation, but, if this be really a satrapal coinage, it seems strange that the suzerain's head should appear only on the obols and on a few of the bronze, and should be absent from the rest of the coinage.

I should prefer, therefore, to explain the helmeted head as the portrait of some ancestor or predecessor of the personage (Mithradates I) represented on the obverse. This ancestor cannot be the founder Arsaces (or Tiridates?), who is always represented beardless (Pl. i. and *rev.* types *passim*); but it may well be intended for Phraates I, the brother and immediate predecessor of Mithradates I, to whose discernment or fraternal affection Mithradates practically owed his throne.

It may be noticed that the king in Pl. ii. 11 appears to be represented in the character of Herakles, and the Herakles type of the tetradrachms in Class III (Pl. iii. 7) may, therefore, have some special significance.

The drachms and bronze (Pl. iii. 2—6) and the tetradrachm (Pl. iii. 1), if rightly joined with them, of Class II were evidently struck in or near the time of Mithradates I. This is shown by style and legend, but especially by the obverse border, which is not the usual circle of dots, but a nearly oval frame formed by the Seleucid or "fillet" ornament that is seen on many of the "Mithradatic" coins (Pl. ii. 1, 12; iii. 8, 12). The identification of the portrait (Pl. iii. 1—6) with that on the obverses of Classes I (Pl. ii.) and III (Pl. iii. 7—13) may be open to doubt, but, on the whole, I am inclined to believe that the same person is represented, allowing for differences of style and fabric.¹

¹ Notice especially the peculiarly rounded shape of the skull in Classes I. and II. (Pl. ii. 6; iii. 3).

Classes I and III are not of the usual Parthian character, but this Class (II) supplies Mithradates with drachms and bronze of the usual type, *i.e.* with head to *left* (not right).

It is generally agreed that the earliest Parthian coins are those with the helmeted and beardless head (Pl. i.; p. 1 *f*, "Beardless head class"). The style, and still more the obverse type, of these pieces is such that it is certainly very difficult to intercalate them among the bearded and unhelmeted series. They exist of many dies, and may well be the currency of a long period extending over more reigns than one.¹ Gardner has assigned those reading **ΑΡΣΑΚΟΥ**; **ΒΑΣΙΛΕΩΣ ΑΡΣΑΚΟΥ**; and **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ ΑΡΣΑΚΟΥ** to Arsaces, the supposed earliest king of Parthia, and to his successor Tiridates I.

Since Gardner wrote, the number of legends in this series has been increased from three to six, and the question of attribution is thus less easily answered than was formerly supposed. These legends are as follows:—

- i. **ΑΡΣΑΚΟΥ**
- ii. **ΒΑΣΙΛΕΩΣ ΑΡΣΑΚΟΥ**
- iii. **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ ΑΡΣΑΚΟΥ**
- iv. **ΒΑΣΙΛΕΩΣ ΘΕΟΥ ΑΡΣΑΚΟΥ**
- v. **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ ΑΡΣΑΚΟΥ ΘΕΟΠΑΤΟΡ[ΟΣ]**
- vi. **ΑΡΣΑΚΟΥ ΑΥΤΟΚΡΑΤΟΡΟΣ**

From i. and ii. not much can be argued, though the legend **ΑΡΣΑΚΟΥ** (a rare variety) would certainly seem to inaugurate the coinage of Parthia.

¹ They are usually of unskilled, almost barbarous, work, though good models (as regards the obverse) were available as shown by Pl. i., nos. 1, 7, and still better by a fine specimen now in the Berlin Museum=Gardner, pl. i. 3 (Imhoof Coll.).

The title **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ** (iii.), however early it may have been assumed by Greek and eastern monarchs,¹ does not occur on *coins* till the reign of Eukratides of Bactria, B.C. 190—160, a king who was contemporary with Phriapatius, Phraates I, and Mithradates I. It occurs also in the Seleucid series, on the money of Timarchus, *circ.* B.C. 162. Unless, therefore, we are to lose sight of these landmarks, we cannot well place the **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ** coins earlier than Phriapatius or later than Mithradates I. I propose to assign them to Phriapatius and Phraates I.

The coins with **ΑΡΣΑΚΟΥ** and **ΒΑΣΙΛΕΩΣ ΑΡΣΑΚΟΥ**, having a simpler form of legend, and being, apparently, earlier in style than the **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ** class,² may be attributed to Tiridates I and Arsaces, son of Tiridates. This coinage is indeed hardly sufficient for the long reign of Tiridates, but the peculiar features of early Parthian history and culture do not necessarily require the assumption (usually made by numismatists) that Tiridates struck coins from the first moment of his reign.

The title **ΘΕΟΥ** (v.) is found in Bactria on the coins of Agathokles and Antimachus, contemporaries (?) of Eukratides, *i.e.* *circ.* B.C. 190—160. It is used by the earliest kings of Syria, though it does not occur on their *coins* before Antiochus IV Epiphanes, B.C. 175—164. Judging, therefore, from the evidence of coins, **ΘΕΟΥ** is likely to have been adopted in Parthia during the period from Phriapatius to Mithradates I.

The title **ΘΕΟΠΑΤΟΡΟΣ** (iv.) first occurs on the series of Alexander I Bala, B.C. 150—145, whose reign coincides with the later portion of the reign of Mithradates I. In the Parthian series

¹ Cp. *Num. Chron.*, 1900, p. 191, n. 16.

² Notice the attenuated figure on the reverse, which grows shorter as the Parthian coinage advances.

itself, **ΘΕΟΠΑΤΟΡΟΣ** is first found on the drachms as this Catalogue to Phraates II, the son of Mithradates I.

If we could assume that this "beardless head" class was at any rate in part—in *conjunction* with the coins with the portrait-heads, the **ΘΕΟΥ** drachm might be of Mithradates I, the **ΘΕΟΠΑΤΟΡΟΣ** drachm of his son Phraates II. In the absence of any decisive indication that the beardless and head drachms circulated *puri passu*, the best course would be to assign, conjecturally, **ΘΕΟΥ** to Phriapatius and **ΠΑΤΟΡΟΣ** to his son Phraates I.

The remaining legend (vi.) supplies the title **ΑΥΤΟΚΡΑΤΩΡ**, which is extremely rare on autonomous Greek coins. It appears on Parthia on the money that is probably of Sinatruces, B.C. 125, and, still later, on the coins attributed *infra* to Tiridates I, B.C. 26. The earliest appearance of **ΑΥΤΟΚΡΑΤΩΡ** in the Seleucid series, on the coins of Tryphon, B.C. 142—139. Cf. *op. cit.* ii. 302. The title cannot, therefore, on coins, be earlier than the period of Mithradates I of Parthia. The coin that bears this title may possibly, therefore, be an early issue of his reign. It is peculiar as being the only drachm in the beardless class that has the head directed to the *right*.¹

Some account has now been given of the history of the Arsacids and the arrangement of their coinage from the earliest times to Mithradates II. The ten years that followed the death of this king, *circ.* B.C. 88, are among the most obscure in Parthian history. During this time (or at least from *circ.* B.C. 85) the influence of the famous Tigranes of Armenia was predominant, and we know that he annexed portions of Parthian territory. During the years 77—70

it is fairly certain that the king of Parthia was
ARTABANUS II, Sinatruces, who, according to Lucian (*Macrob.*, 16),
B.C. 88—77. had reached the age of eighty when he ascended
SINATRUCEB, the throne, being recalled to Parthia after a sojourn
B.C. 77—70. or exile among the Scythian Sakaurakae. I agree

with Mr. Gardner in assigning to this king the coins in Pl. x. 1—7, which alone uniformly present an aged portrait.

In the gap between Mithradates II and Sinatruces, Gutschmid (p. 81) has inserted a king named Artabanus (II), whose existence he infers from an ingenious emendation of Justin, *Prolog.* 41. There is certainly room for a king here, and I suggest the attribution to him of the coins (Pl. viii., ix.) which Gardner has given to Phraates II. On historical grounds, this coinage is, no doubt, difficult to date; for on the drachms we find the remarkable legends **APEIA, MAPPIANH, TPA[Ξ]IANH, KATACTPATEIA** (*infra*, p. 40, note), legends which seem to point to a period of conquest, or at any rate to an asserted claim over Aria and Margiana. We should have looked for such inscriptions in the time of Mithradates I or II, but on numismatic grounds it seems difficult to attribute them to either of these reigns. Judging from the coins themselves,

p. 95; cp. also the correspondence between Marquardt and Six referred to in Holwerda's *Lecensbericht van J. P. Six*, p. 47.

they seem to follow fairly well after our Mithradates II (cp. Pl. ix. with Pl. vi.).¹

Of Artabanus we know nothing; but certainly the portrait on these coins bears considerable resemblance, allowing for difference of age, to that of Sinatruces (Pl. x. 1—7), who was doubtless of Arsacid stock, and who calls himself ΦΙΛΟΠΑΤΟΡΟΣ. Perhaps Artabanus was the father of Sinatruces.

Sinatruces was succeeded by his son Phraates III, probably about B.C. 70. In 66 Phraates conducted an expedition into Armenia against Tigranes and in support of the younger Tigranes, who had quarrelled with his father and fled to Parthia. But after besieging Artaxata Phraates retired, leaving young Tigranes to his fate. In the following year he became embroiled with Pompey, who claimed from him for Tigranes the district of Korduene, and refused him his title of "King of Kings" (Plut., *Pomp.*, 38 &c.); but in 64, when Pompey had departed from Syria, Phraates again attacked Tigranes and defeated him. During his reign of thirteen years Phraates maintained, and somewhat revived, the power of Parthia. He died *circ.* B.C. 57, murdered by his sons Mithradates III and Orodes I.

In attempting to ascertain the coinage of Phraates it is necessary to look forward a little to the coinages of his three successors, Mithradates III, Orodes I, and Phraates IV, as arranged *infra*.

It will be found that the coins of Phraates IV (identified as his by the dates on the tetradrachms) present what may be called the

¹ Notice the treatment of the head, the style of the cuirass, and the reverse type (bowman) of the tetradrachm. These coins bear monograms which are distinct from those on the coins of Mithradates II, and which are not found on the coins of later kings.

stereotyped Parthian legend—for it is seen on nearly all the succeeding coinages—viz. **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΑΡΣΑΚΟΝ ΕΥΕΡΓΕΤΟΝ ΔΙΚΑΙΟΝ ΕΠΙΦΑΝΟΝΣ ΦΙΛΕΛΛΗΝΟΣ**. The drachms of this reign are characterized by the presence of an *adjunct* (eagle, star, &c.) on the obverse and by a constantly recurring series of monograms (**Α**, **Μ**, **Σ**^P &c.) on the reverse.

Working backwards, we find the coins of Orodes I (which may be partly identified by means of the portrait) bearing the recurring series of monograms and obverse-adjuncts of the kind already noticed. His later coins have the above-mentioned stereotyped legend **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΑΡΣΑΚΟΝ** &c., while what may be regarded as his earlier coinage has (usually) **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΑΡΣΑΚΟΝ** and the epithet **ΦΙΛΟΠΑΤΟΡΟΣ**.

The coins assigned to Mithradates III (the predecessor of Orodes) have the recurring series of monograms,¹ and (in their latest series) the title **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΝ**² **ΑΡΣΑΚΟΝ** &c.

There remain two sets of coins to be attributed, Pl. x. (8—14), Pl. xi., and Pl. xii. Both these are characterized by the use of the **Α**, **Μ**, **Σ**^P &c. series of monograms, but both are, presumably, earlier than the coinage that we assign to Mithradates III, because they have only the simple **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΝ**, while the coins of Mithradates III—at least his later coins—display the title **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΝ**. These two coinages, therefore, must be inserted between Sinatruces (the last king whose coins we noticed *supra*) and Mithradates III.

¹ But not, except rarely, the obverse-adjuncts.

² **ΜΕΓΑΛΟΝ** is evidently a survival from the title **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΝ**. In the reign of Orodes I, and in the later reigns, when **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ** had completely superseded **ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΝ**, **ΜΕΓΑΛΟΝ** was omitted as superfluous.

Now in this period only one king is known to history, namely Phraates III, and it is he who would seem to have the best claim to the series in Pl. x., xi., because of its greater abundance and importance, because of the title of "Theos" which (according to Phlegon) was borne by him,¹ and from the use of the helmet found already on the coins of his father Sinatruces.² The series in Pl. xii. can only be supposed to have been issued by some unknown rival king who lived about the time of Phraates III or Mithradates III.

According to Dio, whose account is followed by Gutschmid (p. 86),³

**MITHRA-
DATES III,
B.C. 57—54.**

Orodes I succeeded Phraates III (B.C. 57) while his brother Mithradates III had the kingdom of Media.

Mithradates was exiled by the Parthian nobility on account of his cruelties, and in B.C. 55 fled to Gabinius, the Roman proconsul of Syria. He then succeeded in driving out Orodes, who, however, with the aid of the Surenas, captured Seleucia, which was held for his brother. Mithradates surrendered, and was put to death by Orodes in B.C. 54. His coin-issues thus cover three years, at the longest.

The attribution to this ruler of the coins in Pl. xiii. is that proposed by Gardner (p. 37). The remarkable coin *infra*, p. 66, no. 41, pl. xiii. 13 (which can hardly be dissevered from the rest of the series), if it really bears the name "Phraates" and the date '273' = B.C. 40/39, would show, as I formerly pointed out (*Num.*

¹ The title of "King of Kings," known to have been borne by Phraates is, however, absent from these coins.

² The coins, Pl. xi. 8—13 (pp. 51—89), were assigned by Gardner (p. 33) to Artabanus ["II"] I, the successor of Phraates II, but this attribution is no longer valid now that we have a dated tetradrachm of Artabanus of another type (Pl. v. 1). The coins must then be assigned to some other king, and the attribution to Phraates III perhaps presents less difficulty than any other.

³ Cp., however, Rawlinson, p. 147.

Chron., 1900, p. 93), that the coins were struck, not by Mithradates III, but by Phraates IV in association with his father Orodes. The coin may, however, be read in more ways than one (see the note p. 66 *infra*), and it seems safer, therefore, to make no innovation on Gardner's attribution of this series to Mithradates III.

The reign of Orodes I is one of the most stirring in Parthian annals. It was a time of perpetual conflict with Rome, when Parthia not only resisted a formidable invasion, but made a bold, if futile, bid for empire far to the west of the Euphrates. The year B.C. 54 is signalized by the expedition of Crassus into Mesopotamia, and the following year by his disastrous defeat at Carrhae. Ten thousand Roman prisoners were taken and were settled by Orodes in Antioch, the capital of the province of Margiana.

The years B.C. 52—50 witnessed the first Parthian invasion of Syria, under the nominal leadership of Pacorus I, the young son of Orodes.¹ Syria was evacuated by May, B.C. 50, but in B.C. 40 Pacorus with a large army again invaded Syria. Antioch and all Syria and Phoenicia (except Tyre) fell into the hands of the Parthians. Five hundred Parthian horsemen appeared before Jerusalem, and set up Antigonus as the Jewish king, deposing his uncle Hyrcanus, the Roman nominee. Meanwhile, the Parthian army under Quintus Labienus (the ally of Orodes) overran Cilicia and southern Asia Minor.

But the tide turned in B.C. 39, when Ventidius Bassus, the legate of Antony, put Labienus to flight, and Ventidius's victory at Trapezon over the lieutenant of Pacorus led to the evacuation of

¹ In the winter of 51 Pacorus was recalled from Cyrrhestica by his father, because the satrap of Mesopotamia (Orondapates) had raised a revolt against Orodes in the name of Pacorus.

Syria by the Parthians. The battle of Gindarus in Cyrrhestica followed in the summer of 38, when the Parthians were defeated by the Romans and Pacorus was slain.

Orodes, who was now old and bowed with grief at the loss of his favourite son, associated with himself in the empire Phraates IV, the eldest of his thirty sons, an able but utterly unscrupulous ruler. Phraates thinking—as Justin expresses it—that his father would never die, put him to death and reigned as sole king (B.C. 37).¹

The portrait of Orodes is identified by the inscription $\text{VP}\Omega\Delta\text{OY}$ on the obol on p. 96, no. 245, Pl. xviii. 10, and by the dated tetradrachm in Pl. xv. 2, struck in B.C. 40/39 (year 273) near the close of his reign. The heads on the coins in Pl. xv.—xvii. (drachms and bronze of the “later coinage”) are executed with varying degrees of skill and care, but their assignment to Orodes, on the ground of portraiture and for other reasons, is open to little objection. These coins may be classed in a number of series determined by the various adjuncts on the obverse. Coinage in this reign was evidently conducted on a rather elaborate and complicated system, which was partly followed in the succeeding reign.

The specimens here described as the “early coinage” of Orodes (Pl. xiv. 1—9) a good deal resemble—as Gardner has observed—the coins of his brother Mithradates III (Pl. xiii.), and the portrait is not so unmistakably that of Orodes as on the “later coinage.” The coins of this early coinage display

¹ There is a dated tetradrachm of Orodes I of year ‘273’=B.C. 40/39, but there are no dated coins of the year B.C. 39/38 (either of Orodes or of Phraates IV). The earliest dated coin of Phraates IV is of year ‘275’=B.C. 38/37, or, more exactly, of “Panemus 275”=June B.C. 37 (specimen in Von Petrowicz Coll.).

the title **ΦΙΛΟΠΑΤΟΡΟΣ**, but they all also have **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ** like the "later coinage," and it is difficult to place them anywhere except in the earlier part of the reign of Orodes.

With regard to the tetradrachms, I have followed Gardner's attribution of Pl. xiv. 1 for the early coinage. Coins similar to those in Pl. xiv. 10—12, xv. 1, were long ago assigned to Orodes by Longpérier, and the portrait seems certainly to be his (cp. Pl. xiv. 12 and xvi. with xv. 2, xviii. 10, 11). The attribution to this king was denied by Gardner (p. 45), who assigned the coins to Tiridates II, the rival of Phraates IV, remarking that Prokesch-Osten had published specimens with the date 280 = B.C. 33/32, a date obviously too late for Orodes. Mr. Gardner has here, however, through some oversight, quite misrepresented Prokesch-Osten, for the specimens described by that writer (p. 30; pl. iii. 26) as bearing the date '280' are not of this type (*infra*, Pl. xiv. 11, 12, &c.) at all, but are tetradrachms of a type which—it is not now disputed—was struck by Phraates IV. So far as I know, the tetradrachms of our Pl. xiv. 11, 12, &c. are always *undated*, though many of them are inscribed with the names of months.

The bust on the drachms and bronze of Pl. xviii. 12—14 has generally been accepted as the portrait of Pacorus, and it is, at least, a probable identification. But there seems to be no good authority for reading the *name* of Pacorus on the drachms of Orodes (the supposed legend **ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΑΡΣΑΚΟΝ ΦΙΛΕΛΛΗΝΟΣ ΚΑΙ ΑΡΣΑΚΟΝ ΠΑΚΟΡΟΝ**, *infra*, p. 97, note), and the statement (made, *e.g.* by Gutschmid, p. 93) that Pacorus was joint-ruler with Orodes, therefore, receives no very decisive support from the testimony of the coins.

PACORUS I,
A. B.C. 38.

The chief event of the reign of Phraates IV, whose sole rule began, as we have already seen, after the murder of his father in B.C. 37, is the renewal of the struggle with Rome. In this contest, Antony in some measure played the part of Crassus, and his expedition of B.C. 36, directed against the Parthian dependency of Media, resulted, after the unsuccessful siege of the capital Phraaspa, in a retreat to the Armenian frontier attended by appalling loss. The failure of the expedition brought peace to Parthia, which was, in fact, left practically unmolested by Rome till the time of Trajan. The relations of Phraates with Augustus were of a not unfriendly character, and in B.C. 20 he restored the standards taken from Crassus and Antony—a restitution that made the deepest impression upon the Roman mind. At a later time, B.C. 10 or 9, he sent his four sons to Rome, where they lived under the protection of the Emperor.

The long reign of Phraates was troubled by some internal dissensions. If a passage in Josephus, *Ant. Jud.*, xvi. 8, 4, may be relied on, a Mithradates was a rival king of Parthia in B.C. 12—9; it is at any rate certain that, at an earlier date, Phraates was ousted for a time by King Tiridates II. The date of Tiridates has been often discussed by modern chronologers,¹ chiefly in connexion with the reference to his name that occurs in the Odes of Horace (i. 26, "Quid Tiridaten terreat," &c.). It is stated by Justin (xlii. 5) that Phraates for his intolerable cruelties was banished by the Parthian nobility, who set up Tiridates in his stead. According to Dio (li. 18), Phraates regained his throne in B.C. 30,

¹ See e.g. Fennema, *Quaestiones Parthicae*, p. 44 f.

and Tiridates fled for protection to Augustus, who was then in Syria. According to Justin, the flight of Tiridates took place when Augustus was in Spain, i.e. B.C. 27—25.¹ Most historians combine these two accounts, and suppose that Tiridates was twice appointed king and twice took refuge with Augustus. The evidence of the coins is hardly decisive. The tetradrachms (Pl. xiv. 11, 12, &c.) assigned by Gardner (p. 45) to this king were so attributed on the supposition that they bore the date '280' = B.C. 33/32; but, as we have just seen (*supra*, p. xxxvii.), these coins are really undated, and in all probability are the tetradrachms of Orodes I. The only coins that have any claim to belong to Tiridates are the tetradrachms in Pl. xxiii. 8, 9. These belong to two months only² of B.C. 26, and it is remarkable that in the months immediately preceding and following there are tetradrachms of Phraates IV. The chief reason for regarding these coins as coins of Tiridates, and not as mere varieties of the coinage of Phraates, is that they bear the remarkable title *φιλορωμαῖος*, a title that is unlikely (at any rate at this period) to have been assumed by Phraates. It should be added that there are no dated tetradrachms of Phraates of years 277 (= B.C. 36/35) and 282 (= B.C. 31/30). The absence of coins in B.C. 31/30 may, possibly, be due to the usurpation of Tiridates as described by Dio. The tetradrachms of Pl. xxiii. 8, 9, on the other hand, if they are really of Tiridates, point to a later date (B.C. 26) and are consistent with the account of his usurpation as given by Justin.

¹ Clinton, *Fast. Hell.*, iii., pp. 232—234.

² Xanthicus and Daesius. Coins of the intervening month Artemisius are not known.

The coinage of Phraates IV may, on the whole, be regarded as satisfactorily ascertained, thanks to the series of dated tetradrachms that runs (with the exceptions just mentioned) from 275 (= B.C. 38/37) to 289 (= B.C. 24/23) inclusive. It is curious that there should be no tetradrachms of a later date,¹ but, probably, the deficiency was made good by the abundant issue of drachms. In this *Catalogue* the drachms are arranged (like those of Orodes I) according to the adjuncts on the obverse. One of these adjuncts, an eagle, is a common type on Parthian coins, but here (Pl. xx. 10, &c.) the eagle holds a wreath with which it crowns the head of Phraates, and an allusion may be intended to the success of Phraates against the Roman arms, especially during the invasion of Antony.

Phraates IV, who had murdered his father Orodes, as Orodes had murdered Phraates III, met his own end by parricide. Late in life he had married—*καταπλάγεις τῷ πολλῷ τῆς εὐμορφίας*²—an Italian slave-girl named Musa, presented to him by Augustus, and had had by her a son named Phraataces. It was this son who, in conspiracy with his mother, murdered Phraates and ascended the throne in B.C. 3/2. His earliest dated coin is of 310 (= B.C. 3/2); his latest of 315 (= A.D. 3/4).

The appearance of Musa (Pl. xxiv. 1—4) on most of his coins—and only in one other instance is a queen's head found on Parthian money³—renders it highly probable that she was associated with him as joint ruler. Moreover, according to Josephus, Phraataces

¹ Except perhaps a tetradrachm described as of year 302=B.C. 11/10 by Sibilian, *Catal. Subhi Coll.* (1874), no. 4168.

² *Jos. Ant. Jud.*, xviii. 2, § 4.

³ Pl. xxvii. 18, Æ of Gotarzes.

was reported to have lived with Musa in a union which is regarded by the Jewish historian with natural horror, though we know that such marriages were not repugnant to Persian custom.

The inscription referring to Musa (p. 140 *infra*) is ΘΕΑΣ ΟΥΡΑΝΙΑΣ ΜΟΥΣΗΣ ΒΑΣΙΛΙΣΣΗΣ. Josephus (*loc. cit.*) calls her *Θερμουσα* or (ed. Naber) *Φορμουσα*—an evident blunder, whether due to himself or his scribe, for *θεὰ Μούσα*. Musa is not uncommon as a male and female name¹: we find, for instance, a Musa, daughter of Orsobaris, on first century (B.C.) coins of Prusias ad Mare.² And the assumption of the names of individual Muses seems to have been something of a Court fashion during the first century B.C. The Parthian queen identifies herself with Urania; the sister of Tigranes III, king of Armenia (B.C. 12—6), is called Erato, and the wife of the Graeco-Indian king Hermaeus (*circ.* B.C. 25), Calliope. Erato and Calliope, like Thea Musa Urania, appear on the coins with their names and portraits.³ The title *θεά* is assumed by other queens, for example, by Cleopatra, queen of Syria (B.C. 125), whose coins are inscribed ΒΑΣΙΛΙΣΣΗΣ ΚΛΕΟΠΑΤΡΑΣ ΘΕΑΣ ΕΥΕΘΡΙΑΣ.⁴

The reign of Phraataces was not eventful. In A.D. 1 he had a conference with Caius Caesar in an island of the Euphrates, while the armies of Rome and Parthia were drawn up on opposite banks of the river. As a result of this meeting Phraataces withdrew from interference in the affairs of Armenia. A revolt of the Parthian nobles in A.D. 4 put an end to his rule. He fled to Roman territory, and appears to have died shortly afterwards.⁵

⁵ Gutschmid, p. 118.

In the room of Phraataces the nobles set up an Arsacid named
ORODES II,
A.D. 4?—6? Orodes II, who, according to Josephus,¹ incurred the hatred of his subjects by his cruel and intractable disposition, and was assassinated while at a banquet or on a hunting expedition. The only coin that can be assigned to him² is the very rare tetradrachm in Pl. xxiv. 5. The portrait on this piece (specimens of which are at Berlin and in the Hermitage) bears considerable resemblance to that of the next king, Vonones I (Pl. xxiv. 6), to whom, however, it would, on other grounds, be somewhat difficult to assign the coin. Its date, year 317 (=A.D. 5/6), fits in with what was the probable period of the reign of Orodes. The exact date of this king's death is unknown, but, from the numismatic evidence, it may be approximately assigned to A.D. 6.

A time of bloodshed and anarchy appears to have ensued,³ till at
VONONES I,
A.D. 8/9—11/12. last (in A.D. 8/9, or earlier) the Parthian nobility despatched an embassy to Rome requesting that one of the four sons of Phraates IV might be sent from Rome to fill the throne of Parthia. The eldest son, Vonones I, was chosen, but the refined, or effeminate, habits that he had acquired in Rome soon disgusted his subjects, more especially as he showed a marked distaste for such typically Parthian occupations as hunting and riding. A rival was set up in the person of Artabanus III, who was an Arsacid on his mother's side and had grown to manhood among the hardy tribe of the Dahæ. In his first attack upon the reigning king he was defeated,⁴ and Vonones thereupon struck a

¹ *Ant. Jud.*, xviii. 2, § 4.

² The attribution of a bronze coin in Prokesch, p. 42, seems doubtful.

³ Cp. Tac., *Ann.*, ii. 2.

⁴ Jos., *Ant. Jud.*, xviii. 2; Tac., *Ann.*, ii. 3.

remarkable series of drachms (Pl. xxiv. 7) with the inscription **BACIAEYC ONΩNHK NEIKHCAC APTABANON**. This inscription not only served to commemorate the victory, but emphasized the fact that the reigning 'Arsaces' was Vonones and not Artabanus. The earliest dated tetradrachm of Vonones is of 320 = A.D. 8/9, and from the appearance on this coin of the type of Nike, and the personal name 'Vonones' (in addition to the ambiguous 'Arsaces'), it may be inferred that his struggle with Artabanus began at the very outset of his reign. The tetradrachms seem to have been issued in haste, and are almost invariably re-struck on the corresponding coins of Phraataces and Musa.

The only other dated coins of Vonones are those of years 322 and 323, i.e. A.D. 10—12. But we have also dated tetradrachms of the same years bearing different types. These latter have been usually assigned, and no doubt correctly, to Artabanus III (Pl. xxv.). Vonones I, therefore, probably ceased to be *de facto* king of Parthia in 323 = A.D. 11/12, and it is at any rate certain from the historians that he was ultimately defeated by Artabanus, and fled to Armenia, where he was chosen (A.D. 16) to fill the throne then vacant. He subsequently withdrew from Armenia to seek the protection of the Roman governor of Syria, and finally died in Cilicia in A.D. 19.

The accession of Artabanus, according to the numismatic evidence already cited, may be assigned to year 322 = A.D. 10/11. There is a tetradrachm of 323 = A.D. 11/12, but no dated coin appears again till year 331 = A.D. 19/20,¹ when the tetradrachm (Pl. xxv. 2) shows a city-goddess and a kneeling Parthian subject presenting the king

¹ In the interval between A.D. 11/12 and 19/20 fall the 'civic coins' (probably of Seleucia) dated '326' = A.D. 14/15 and '327' = A.D. 15/16; see Gardner, p. 59, pl. vii. 21 = Prokesch, pl. iv. 36; and Gardner, p. 60; Prokesch, p. 48 (year '327').

with the diadem. A few years later Artabanus issued a remarkable tetradrachm (Pl. xxv. 5), with the portrait full-faced, and having on the reverse the king on horseback received by the Tyche of a city. With this tetradrachm—which is of year 338=A.D. 26/27—the coinage of this king apparently ends, yet it is certain that he reigned for twelve or thirteen years longer.

The absence of coinage may be explained, though only partially, by the troubled circumstances of the later period of this reign. On the death, in A.D. 34, of Artaxias III the king of Armenia, who had reigned under Roman protection, Artabanus set up his own son Arsaces on the vacant throne. The oft-repeated struggle for supremacy in Armenia was once more renewed, and Artabanus was opposed by Pharasmanes king of Iberia, who, at the instigation of the Emperor Tiberius, put forward his brother Mithradates as claimant to the Armenian crown. The Parthian troops were worsted, and in A.D. 36 Artabanus was faced by the serious revolt of the Parthian nobility under Sinaces. The rebels were aided by Tiberius, who sent to the East as king of Parthia one of the Arsacid princes who still resided in Rome, namely Tiridates III, the grandson of Phraates IV. Tiridates was welcomed in Seleucia and crowned king in Ctesiphon. Artabanus fled to Hyrcania and found an asylum, like earlier Parthian kings, among the nomad Scythian tribes. A counter-revolution soon, however, led to the dethronement of Tiridates, and in A.D. 37 we find Artabanus once more upon the throne and adopting a submissive attitude to Caligula, the new Roman Emperor. At a somewhat later period, a fresh revolt, in favour of Cinna, a foster-son of the Parthian king, forced Artabanus to take refuge with Izates king of Adiabene. But Cinna soon abdicated, and the rightful king was a second time restored. There are no coins that can be attributed to this usurper or to Tiridates III.

Artabanus probably died in A.D. 40, as there is a dated coin struck by a new king (Gotarzes) in year 352=A.D. 40/41.¹

Two sons of Artabanus III, Vardanes I and Gotarzes,² appear as rival claimants to the throne, and it is important to notice (in the following list) the years in which each issued dated *tetradrachms* :—

According to Josephus (*A. J.*, xx. 3), Vardanes was the immediate

¹ See *infra*, p. 161, note 1. Prokesch publishes a coin of Vardanes I with an earlier date, '351'=A.D. 39/40, but the reading is doubtful: see p. 153, note 1, *infra*.

² I take the ungrammatical legend on the drachm of Gotarzes, p. 165, no. 33, *infra*, pl. xxvii. 2, to mean simply "Arsaces, King of Kings, called (or 'whose personal appellation is') Goterzes, son of Artabanus." Compare ΦΡΑΑΤΟΥ ΕΠΙΚΑΛΟΥΜΕΝΟΝ on no. 41, p. 66, *infra*. Some writers suppose VOC ΚΕΚΑΛΟΥΜΕΝΟC to mean 'adopted son.' The name of this king appears as 'Gotarzes' on the tetradrachms, on the monument of Behistun (as to which see Justi in Geiger and Kuhn, *Grundriss der iran. Phil.*, ii., p. 504, note 3; cp. Mommsen, *Provinces*, vol. ii., p. 7, Eng. trans.), and in Tacitus, *Ann.*, xi. 8—10; xii. 10—14 (cp. Jos., *A. J.*, xx. 3). On the drachms it is written 'Goterzes.'

successor of his father; but it will be seen that the coins confirm the statement of Tacitus (*Ann.*, xi. 8), who makes Vardanes the successor. The Parthian nobility, however, who disgusted by the cruelties of Gotarzes, offered the throne to Vardanes, who, though then far distant, hastened to Rome, accomplishing an immense journey in two days. Gotarzes, the Scythian Dahae, and Vardanes seized the reins of government in the course of year 353=A.D. 41/42, to judge from the date of the coins. Gotarzes having raised an army of Dardanian Hyrcanians prepared to assert his claims, but an arrangement was made by which he agreed to retire to Hyrcania, while Vardanes remained practically in possession of the kingdom.

It was probably about this period that Vardanes succeeded in reducing the great city of Seleucia, in the year of its revolt against Arsacid rule (Tac. *Ann.*, xi. 9; cp. § 8). Rawlinson¹ and others ascribe the surrender of the city to A.D. 46, but Gutschmid (p. 123) is right in ascribing it to A.D. 43. There are bronze coins (nos. 6—8) of Vardanes dated year 354=A.D. 42/43 and year 43/44, which have on the reverse the type of **BOYAH**, and it is probable, were issued by the Senate of Seleucia on retirement of Gotarzes.

During the years A.D. 41/42—42/43 Gotarzes had struck no coins, but he again issued money in 43/44, and this issue probably coincides with the renewed attack (mentioned by Tacitus) that he made on the throne of Vardanes. Gotarzes was defeated by his rival, but in 45 Vardanes fell a victim to a conspiracy and was murdered while hunting.

Gotarzes was now sole ruler, but in various ways—*per saevitiam ac luxum* (Tac., *Ann.*, xi. 10 ; cp. xii. 10)—once more aroused the displeasure of his subjects. The appearance on some of his tetradrachms of '357' (=A.D. 45/46) and '358' (=A.D. 46/47), and on the undated drachms, of his personal name, "Gotarzes son of Artabanus,"¹ in addition to the usual 'Arsaces,' is perhaps an indication that at the beginning of this his second reign his right to rule was being called in question. It is certain, at any rate, that a Parthian embassy requested the Emperor Claudius to send them a new king in the person of Meherdates, the son of Vonones I, and thus grandson of Phraates IV.² In 49 Meherdates, with the Emperor's sanction, left Rome for the East, but he was opposed by Gotarzes, and taken prisoner in the following year. His life was spared, but he was punished by a mutilation which, according to Eastern ideas, incapacitated him from ever ruling as king. Gotarzes, according to Tacitus,

p. 60, pl. vii. 24. '353,' Brit. Mus.; Behr Cat., no. 940. No. 12, pl. xxxvii., *infra*—a common coin—bears the date "224, Dios" (not '324' as misprinted in Gardner, p. 60), which corresponds in the Seleucid Era to B.C. 89/8. The character of the types is somewhat suggestive of a later date, so that it is possible that the coin is not really dated from the Seleucid Era. The attribution to Seleucia, though not certain, seems probable.

¹ See note, p. 165, *infra*.

² Tac., *Ann.*, xii. 10. According to Gutschmid (p. 127) the embassy was sent in A.D. 47, though its petition was not granted till A.D. 49.

died from some disease, no doubt in A.D. 51, in which year his coinage ceases.

The currency of Gotarzes was of considerable extent (Pl. xxvi.—xxviii.). His drachms, in particular, are still discovered in enormous numbers, and the types of the bronze pieces are numerous. The tetradrachms of Vardanes show on the king's forehead the curious wart that had appeared on the coins of Orodes and Phraates IV; this does not occur on the corresponding money of Gotarzes, who, however, always has—apparently as a substitute—a lock of hair falling over the temple (Pl. xxvi. 13).¹

The successor of Gotarzes was Vonones II, whose reign, according to Tacitus (*Ann.*, xii. 14), was brief and inglorious. I share Prof. Gardner's doubts as to whether any of our extant coins can be attributed to him. Gutschmid (p. 128), indeed, asserts that the tetradrachms of A.D. 51—54, assigned by Gardner and in this Catalogue (Pl. xxviii. 12) to Volagases I, the next king, belong to Vonones; but he attempts no discussion of his proposed attribution, which is almost certainly invalidated by the fact that the drachms (Pl. xxviii. 15) that seem to accompany these tetradrachms are identical in style with the drachms inscribed with the name of Volagases (Pl. xxviii. 16; xxix. 1). Moreover, if Gutschmid's view be accepted, it would give Vonones II a reign of several years, from A.D. 51 to 54, though it is certain from Tacitus that Volagases was reigning in Parthia during this period.

¹ Other points of difference between the coins of Vardanes I and Gotarzes are that Gotarzes has a long beard (on the drachms, straight), Vardanes a shorter beard of another shape, and that, on the tetradrachms of Vardanes the Tyche offers to the king a palm-branch, on those of Gotarzes a diadem.

The last dated coin of Gotarzes was of Daesius A.D. 51; the first dated coin among those assigned by Gardner and myself to Volagases I is of Gorpiaeus 51. The reign of Vonones II, which falls in the interval, can therefore have lasted only for about three months of A.D. 51.

Vonones II left the throne to his son Volagases I, whose coinages, as arranged in this Catalogue, may be briefly summarised as follows:—

VOLAGASES I,
A.D. 51—77/78.

I. *Earlier Coinages.*

A.D. 51—54. Dated tetradrachms, Class A (Pl. xxviii. 12).

A.D. 55/56—57/58. Dated tetradrachms, Class B (Pl. xxviii. 13).

A.D. 51—58. Drachms (some inscribed "*Fol.*") and Æ (Pl. xxviii. 15, 16; xxix. 1—4).

II. *Later Coinages.*

A.D. 60/61—67/68. Dated tetradrachms (Pl. xxix. 5).

(? A.D. 60/61—77/78.) Drachms and Æ (Pl. xxix. 6—14).

With the numismatic evidence thus before us we can discuss the probable duration of the reign of Volagases I.

DURATION OF HIS REIGN.

From the evidence of the dated tetradrachms of I., Class A, compared with the statement of Tacitus (*Ann.*, xii. 44), there can be little doubt that the reign began in A.D. 51, but the date of its close is less certain. Most numismatists, including Prof. Gardner, observing the undoubted differences that exist between what I have classed as the earlier and later coinages of Volagases I, have come to the conclusion that the coins struck from about A.D. 60 onwards cannot have

been issued by the monarch who struck the earlier coins. They therefore conjecture that Volagases I died *circ.* A.D. 60, and that he was succeeded by a Volagases "II." For my own part, I do not consider that the differences between the two sets of coins are so great as to compel us to assign them to different rulers; and, in any case, it must be borne in mind that the historians give no hint whatever of the existence of this supposed Volagases II, nor is there any statement that would lead to the supposition that Volagases died in, or about, A.D. 60. On the contrary, a Volagases is mentioned in the authors as late as A.D. 75, and there is no historical reason for supposing him to be distinct from Volagases I. In this Catalogue, the coinages both before and after *circ.* A.D. 60 are assigned to Volagases I. The dated specimens carry the reign only as far as A.D. 67/68, but, as we have just seen, Volagases was probably still reigning in 75. The earliest coins of his successors, Pacorus II and Volagases II (= Gardner, Volagases "III"), are dated year 389 = A.D. 77/78, and that year may be regarded as the probable date of the death of Volagases I.

The reign of Volagases I was disturbed in A.D. 55 by the revolt of his son Vardanes (II), but the details and extent of this movement are known only from the brief mention in Tacitus (*Ann.*, xiii. 7):—
REVOLT OF VARDANES II, A.D. 55. *exortusque in tempore aemulus Vologesi filius Vardanes.* Several numismatists have assigned coins to Vardanes struck during the time of his supposed rival kingship. Mr. Gardner's attributions (p. 51; pl. vi. 1—3) to Vardanes II are as follows:—

- i. Tetradrachms, dated A.D. 55/56—57/58 (= Pl. xxviii. 13, 14, *infra*; Volagases I, Early Coinage, B).

- ii. Drachms and Æ; type, beardless head in helmet (=Pl. xxix. 15—18, *infra*).
- iii. Bronze with *rev.* inscribed **BNANO** (?) (= Pl. xxxvii. ΔΙΟΣ
1, and p. 252, no. 1, 'Uncertain,' *infra*).

It seems a fair criticism of these attributions to say that they furnish Vardanes with an extremely heterogeneous currency. For while the tetradrachms (no. i.) show a bearded head of the ordinary diademed type, the drachms (no. ii.) have a full-face helmeted head which is beardless; and the combination of bearded and beardless heads is the more remarkable because Vardanes (assuming, for the moment, the tetradrachms (no. i.) to be his) can only have reigned for about three years. No. iii. has a portrait-head which differs from both i. and ii. I think it is the safer course to regard the tetradrachms (no. i.; pl. xxviii. 13, 14) as the second issue of Volagases I (Early Coinage, B): in essentials the portrait is sufficiently like that on the Early Coinage, A (Pl. xxviii. 12). No. iii. (Pl. xxxvii. 1) is unique, and poorly preserved both on obverse and reverse. The details of the portrait cannot be well made out, and the reverse legend is not certain. Gardner reads it **BNANO**, or, possibly, **BAPΔANO** (in ligature). I have not ventured to attribute the coin.¹

The drachms (no. ii.) and the accompanying bronze (Pl. xxix.

¹ Gutschmid (p. 130) reads **B NANO**, which he interprets *Βασιλέως Νάνου*. He rejects the *Bapδανο* rendering, yet at the same time (for what reason I know not) assigns the coin to the personage who revolted from Volagases I. For the usual reading in Tac., *Ann.*, xiii. 7, "aemulus Vologesi filius Vardanes," he substitutes "aemulus Vologesi filius Vardanis," which he interprets:—"a rival to Volagases arose in the person of the son (whose name is known from coins to have been 'King Nanes') of Vardanes [I]."

15—18) seem to be the only coins to which Vardanes II may lay claim. The beardless head and the ornamented helmet or tiara present affinities with some of the coins of the successor of Volagases I, Pacorus II (cp. Pl. xxix. 15—18 with Pl. xxx. 1—9; xxxi. 1—4), but it is difficult to fit them into the other coin-series assigned to Pacorus II.¹ I therefore ascribe these pieces to Vardanes II, though with some hesitation, as it is not certain from the solitary mention of the revolt of Vardanes (Tac., *Ann.*, xiii. 7) that he ever succeeded in making himself king or in effacing Volagases.²

Volagases I was not the lawful son of his predecessor Vonones II, but, on his accession, he came to an agreement with his two legitimate brothers, by which one (Pacorus)³ received the kingdom of Media Atropatene, while the other (Tiridates) was designated for the kingdom of Armenia. The attempt of Volagases I to establish Tiridates on his throne once more revived the contest with Rome for the Armenian overlordship. The struggle lasted with varying success from near the beginning of the reign of Volagases till A.D. 63, or rather 66, the year in which Tiridates, magnificently escorted by 3000 horsemen of Parthia, visited Rome and 'did homage' to Nero for Armenia.

¹ Note also that the treatment of the head-dress of Arsaces on the reverse of the drachms resembles that on the drachms of Volagases I (early coinage), rather than that on the drachms of Pacorus II. The 'wart' on the drachms now in question is indicated by a stroke, as on the drachms of the early coinage of Volagases I.

² Possibly we may find traces of the revolt of Vardanes in the absence of tetradrachms of Volagases I of year 366=A.D. 54/55, and also in the occurrence of the name "Vol" on some of the drachms of Volagases: it is well known that the appearance of the personal name of an Arsacid generally indicates either that he was jointly ruling with another king, or that his claim to rule had been disputed by a rival.

³ He is distinct from Pacorus II, King of Parthia.

By this compromise the claims of Rome had the appearance of being satisfied, but the substantial advantage remained with Parthia.

Towards the close of his long reign Volagases had to confront an invasion of the Alani, who ravaged Media and Armenia, and in A.D. 75 invaded Parthia itself. His reign is also marked by the revolt, in 58, of the province of Hyrcania, which from about this period seems to have been permanently lost to the Parthian Empire. Volagases was the founder of Vologesias or Vologesocerta, a city in the neighbourhood of Selencia ad Tigrim.¹ The somewhat unusual type in Pl. xxix. 2, 3, a civic Tyche standing between two columns, may possibly be explained as referring to this newly founded city.

The coinage of Parthia now bears testimony for many years to come of the existence of monarchs who reigned contemporaneously, and it will be convenient to insert here a table showing the years of which dated coins (tetradrachms and bronze) are known to exist (A.D. 77/78—148/9).

The successors of Volagases I were Pacorus II and Volagases II, but their parentage and connexion with one another are unknown. They reigned for a short time contemporaneously, for of both we possess named and dated tetradrachms of years 389 (=A.D. 77/78) and 390 (=A.D. 78/79). After '390' Volagases II disappears from the scene, apparently, however, to resume coinage after the lapse of more than thirty years (see *infra*, under 'Volagases II').

Of Pacorus there is a fairly continuous series of dated coins from year '389' to year '407' (=A.D. 95/96), but the scanty notices of this king in the authors tell us little about his reign, which was probably one of slight political importance. Although his dated coinage ends in A.D. 95/96, he was certainly king of Parthia during part of the reign of Trajan. In A.D. 110 (according to Gutschmid's chronology¹), he sold the kingdom of Edessa to Abgarus VII, son of Izates, and his death probably took place about that time; for from A.D. 109/10 (=year '421') the dated coins of a new king (apparently Osroes) begin to appear, and form a nearly continuous series.²

The earliest coins of Pacorus (Pl. xxx. 1, 2) show a beardless and youthful head. In '393' (=A.D. 81/82) he introduces a new reverse (Pl. xxx. 3, 10)—the king on horseback receiving the diadem from the Tyche, while another object, apparently an untied diadem, is brought by a Parthian subject. This is a modification of earlier Arsacid types: see tetradrachms of Artabanus III, Pl. xxv. 2, 3;

¹ *Gesch. Irans*, p. 140.

² There are dated bronze coins of an earlier date, viz. year 418 (=A.D. 106/07) and year 419, of somewhat doubtful attribution (see *infra*, p. 204, note). They cannot well be attributed to Pacorus himself, but may possibly be the first coinage of Osroes.

cp. 5, 6; cp. Pl. xxxi. 5. On his last coinage Pacorus assumes a helmet. The execution of the obverse of the drachms of this coinage (Pl. xxxi. 2) is unusually careful and ornate for the period. Possibly a gem-engraver had a hand in the work, though the reverse is obviously by a mere mechanic of the mint. The younger Pliny (*Ep.*, x. 16), in a letter to Trajan, refers to a gem which bore the portrait of Pacorus.¹

In "392" = A.D. 80/81 (of which year there are probably no coins of Pacorus II) the named and dated tetradrachms of a king Artabanus (IV) appear (Pl. xxxi. 5).² He is known from a mention in Zonaras (*Ann.*, xi. 18; cp. Sueton., *Nero*, 57), who speaks of the Parthian king Artabanus supporting the cause of the pseudo-Nero who appeared in the Euphrates region in the reign of Titus.

On his tetradrachms the Tyche offers what appears to be an untied diadem to the king. This unusual representation of the diadem probably suggested the untied diadem which (as we have seen above) occurs on the tetradrachms of Pacorus II of year 393 (= A.D. 81/82).

Osroes, the brother and successor of Pacorus II, struck no tetradrachms, but the drachms and bronze coins in Pl. xxxi. 6—15; xxxii. 1—5, assigned to him by Longpérier and Gardner, are probably his. On all these pieces (except the first two) the head is conspicuous by the arrangement of the hair in enormous bunches.³

¹ "Dum requiro gemmam, quam sibi [*i.e.* Callidromus, a former servant of King Pacorus], habentem imaginem Pacori, et quibus insignibus ornatus fuisset, subtractam iudicabat."

² No corresponding drachms and bronze can with certainty be identified as his.

³ The passage from Lucian, *Quomodo hist. conscr.*, 19, which Longpérier

The accession of Osroes, judging from the dated bronze coins (p. 205, no. 8, *infra*), took place not later than A.D. 110, and if the bronze of '418' and '419' (p. 204, note, *infra*) are really his, his reign began as early as A.D. 106/07. His reign is notable for the conflict with Rome brought about by his interference in the affairs of Armenia. Exedares, the Armenian king whom the Romans acknowledged, was deposed by Osroes, who seated a new sovereign (Parthamasiris) on the throne. In 113 Trajan set out in person for the East. Little resistance was offered to his progress through Parthian territory, a circumstance due, according to Dio Cassius (lxviii. 26), to the shattered condition of Parthia, which had been brought low through the civil wars and by rebellions which still remained unsubdued. Armenia and Mesopotamia became Roman provinces in 115. In 116 the province of 'Assyria' was formed, and in the same year Seleucia and Ctesiphon were captured. The Parthian king fled, and his daughter and the "golden throne" of the Arsacids were carried off by the Romans.

The death of Trajan in 117 and the accession of Hadrian brought relief to Parthia.¹ The new Emperor, reverting to the policy of Augustus, withdrew his legions to the Euphrates frontier and abandoned Mesopotamia and Assyria. In 130² he restored to Osroes the daughter who had been taken captive by Trajan, though he refused, like his successor, to restore the golden throne. Osroes probably died about this time: his last dated coin is of A.D. 127/28.

(p. 144) cites in connexion with the curious coiffure on the coins attributed to Osroes, really refers to another Osroes, the general of Volagases III.

¹ In 117 Trajan had set up at Ctesiphon an Arsacid named Parthamaspatas as king of Parthia, who is not known to have issued coins. He had soon to give way to Osroes, and in 119 Hadrian made him king of Osroene.

² Gutschmid, p. 146.

A king named Volagases is known from the coins to have ruled
VOLAGASES II, in some portion of the Parthian empire during part
A.D. 77/78— of the reign of Osroes. His tetradrachms cover the
146/47. period A.D. 121/22 (year 433) to A.D. 146/47 (year
 458).¹ If the bronze coins, Pl. xxxiii. 1—5, with a long beard and
 helmet are also his,² he must (as shown by the inscribed dates) have
 been reigning from A.D. 111/12 (year 423).

The earliest of the tetradrachms resemble so very closely the
 tetradrachms struck by the Volagases (II) who in A.D. 77—79
 reigned contemporaneously with Pacorus II (see table *supra*,
 p. liii.) that the conclusion is almost inevitable that the tetra-
 drachms of A.D. 121/22, &c., were struck by the same Volagases
 who issued the coins of A.D. 77—79.

Before proceeding, the drachms bearing in Pehlvi writing the
 name of "King Mithradates" must be noticed
MITHRA- (Pl. xxxiii.). Longpérier (p. 139 f.) and Gut-
DATES IV, schmid (p. 144) identify this ruler³ with the
 Meherdotes who is described by John Malala as
 "King of Persia," a Parthian by race and brother
 of Osroes. According to Gutschmid's interpretation of the more
 or less legendary account of Malala, this Meherdotes headed
 the rebellion against the Romans in Mesopotamia in 116, during
 the temporary absence of Trajan, and died soon after.

This identification, both on historical and numismatic grounds,
 is not very satisfactory, and hardly enough attention seems to

¹ The tetradrachm of year 460=A.D. 148/49, cited by Longpérier, p. 147, is really of our Volagases III. According to Gutschmid's view (p. 147), no mention of Volagases II occurs in the Authors.

² But possibly they are the coins of some other rival king of this period: see *infra*, p. 215, note.

³ Gutschmid refers to him as Meherdotes (Mithradates) "VI."

have been paid to the indications of date furnished by the style and epigraphy of the coins.¹

In this Catalogue, I have divided the drachms (p. 217 f.) into three classes, α , β , γ . α and β lack the name of Mithradates, but closely resemble in portraiture those drachms (Class γ) which bear his name in Pehlvi. In a note appended to the description of the coins (p. 217) it has been pointed out that the legends of Classes α and β are written as on the drachms of Osroes and Volagases II, while the legend of γ bears an unmistakable resemblance to the legend of the drachms of Volagases III, Class α . Although one may well hesitate to introduce a king unknown to history, yet the testimony of the coins, so far as it goes, seems clearly to indicate that a king named Mithradates was ruling in Parthia about the time of Osroes, and was still on the throne in or about the period of Volagases III. Probably the safest conjecture will be to suppose that he succeeded Osroes after the death of the latter in A.D. 130, reigned for some years contemporaneously with Volagases II, and died about the time of the accession of Volagases III, A.D. 147/148. Like Osroes, this king struck no tetradrachms. The bronze coinage attributed to him (Pl. xxxiii.) consists of small pieces only, and is somewhat remarkable for the number of its animal types.

Volagases III, the successor of the second Volagases, issued a long series of tetradrachms from year '460' VOLAGASES III, to '502' inclusive (Pl. xxxiv. 1, &c); his earliest A.D. 147/48-191. coin being a bronze piece of '459' (see note, p. 232, *infra*). His rule can thus be dated from A.D. 147/48 to 191.

¹ The bronze coin supposed to be of this king, and to be dated year '424'= A.D. 112/13, cannot safely be admitted as evidence: see *infra*, p. 222, note.

The chief events of this period are almost a repetition of those of the reign of Osroes. Early in the reign of M. Aurelius (A.D. 162) Volagases invaded Armenia, and, deposing Sohaemus, the Roman nominee, set up a new king in the person of Pacorus. Syria was also invaded, and the "Armenian" (A.D. 163) and "Parthian" (A.D. 164—165) wars with Rome followed as an inevitable consequence.

Armenia was soon regained by the Romans, and Sohaemus was reinstated. More disastrous to Parthia was the Roman invasion of Mesopotamia in 164, when Seleucia, the centre of Hellenism, was burnt, and the royal palace at Ctesiphon destroyed. In 165 (or 166) Volagases was glad to accept the Roman terms of peace, by which Parthia relinquished not only its suzerainty over the kingdom of Edessa, but also the whole of Western Mesopotamia, the last a surrender of the gravest moment to the enfeebled empire of the Arsacids.

The next reign, that of Volagases IV, is again marked by a disastrous war with Rome. Volagases and other
VOLAGASES IV, Eastern princes supported the cause of Niger,
A.D. 191— the rival of Sept. Severus, and in 194 a rising
207/08? against the Romans in Mesopotamia led to the
 wars which lasted from A.D. 195 to 199.

In 195 Severus took up his quarters at Nisibis, and a successful campaign in Adiabene followed in 196. In 198 the Parthians, who had ravaged Mesopotamia, fell back before Severus, and in the same year¹ Seleucia and Ctesiphon were sacked. At Ctesiphon the royal treasures and 100,000 prisoners fell into the hands of the Romans. As the result of this war, Rome recovered her

¹ Or, according to Gutschmid, in the winter of 199.

position in Mesopotamia and gained possession of the fertile region of Adiabene.

The tetradrachms of this king (Pl. xxxv. 7, 8) begin in year '502,' and extend at least to year '516.' The tetradrachms of '519' and '520' that have been assigned to this Volagases were probably issued by his successor Volagases V (see note, *infra*, p. 239), who undoubtedly began to coin in '519.' The reign of Volagases IV may, therefore, be dated from year 502 to year 519?, *i.e.* A.D. 191—207/08? The head on his coins is not helmeted, and the hair is arranged in great bunches as on the money of Osroes.

Volagases V, the son of the last king, was the immediate successor of his father. His tetradrachms (Pl. xxxv. VOLAGASES V, 14, 15; xxxvi. 1) cover the period from '519' A.D. 207/08—221/22? to '533,' and his reign may thus be dated A.D. 207/08—221/22? About A.D. 213¹ his claims

were disputed by his brother Artabanus V, who in about three years appears to have gained the upper hand, and ARTABANUS V, who is, at any rate, the Parthian king who is circ. mentioned in 216 in connexion with the Parthian A.D. 213—227. war begun by Caracalla. The Emperor was assassinated in April 217, but Artabanus, who had put a large army into the field, held out against his successor Macrinus, and defeated the Romans at Nisibis. In 218 Macrinus came to terms with Parthia, retaining Mesopotamia, but paying an indemnity of five million denarii.

The closing years of this reign are memorable for the rise of the Persian Ardashir (*circ.* A.D. 224) and for the series of

¹ See Gutschmid, p. 154.

events which led to the final subjugation of Parthia by the Sassanian dynasts. This revolution in Iran, says Mommsen,¹ did not merely replace one decayed Arsacid dynasty by another, but was the outcome of national and religious aspirations, and substituted for the bastard and superficially Hellenized civilization of the Parthians "the state-organization, faith, manners, and princes of that province which had created the old Persian Empire." Artabanus was defeated by Ardashir in three great battles, in the last of which (April, A.D. 227) he perished.

The tetradrachm and drachms (*infra*, p. 251; cp. Pl. xxxvi. 14, 15) assigned to Artavasdes—perhaps a son of Artabanus²—furnish the last evidence of the independence of Parthia, and bring the long series of its coinage to an end.

ARTAVASDES,

cire.

A.D. 227/28.

§ 3. DENOMINATIONS AND WEIGHT.

The coinage consists of silver and bronze pieces—there are no gold coins—struck at first on the Attic standard, which was afterwards reduced, or which, it may be, was superseded by the Phoenician standard.

The chief denomination is the *drachm*, which was struck in enormous numbers at all periods. The quality of the silver (so far as discernible by the eye) remains good almost throughout the coinage, and the weight³ of well-preserved specimens in the earlier

¹ *Provinces*, ii., p. 80 (Eng. trans.).

² Longpérier, p. 158.

³ The following statements as to weight are generally based on an examination of well-preserved specimens in the British Museum.

reigns, till Orodes I inclusive, does not fall below 60 Troy grains, and may be approximately stated to range from 60 grains to 67 grains.¹ The drachm of Phraates IV weighs from about 57 to 61 grains, but is more often than not below 60 grains. From this reign, in fact, till the fall of the Arsacid kingdom, the drachm (with very rare exceptions) never again attains the weight of 60 grains. Markoff, in a dissertation on Parthian metrology,² describes this falling-off of weight as a supersession by the Phoenician standard of the Attic system originally in use. It is not, perhaps, of much moment, whether we describe the later standard as the Phoenician, or as the Attic gradually reduced. It may be remarked, however, that in almost every reign, from Phraataces to the latest kings, there are instances of drachms of somewhat high weight for the Phoenician system : thus, *e.g.* Phraataces, 58·7 grains ; Vonones I, 59·7 ; Pacorus II, 58·6 ; Mithradates IV, 59·2 ; Artabanus V, 58·2.³

The lesser denominations are the triobol, diobol, and obol. The *triobol* is found only in the reign of Phraates III (Markoff, *op. cit.*, no. 17; pl. iii. 17, "Mithradates II"). The *diobol* occurs in the "beardless head" series (Brit. Mus., 15·2 grains, thin and rather worn), and also under Orodes I (Brit. Mus., 19·5 grains). The *obol*, though not extant in large numbers, was probably fairly common. It was minted in the early reigns till Phraates II (inclusive), and recurs under Orodes I. In the period of Mithradates I (Class I) its

¹ Two thick drachms of the period of Mithradates I, Class II, weigh 68, 68·9 grains. A drachm of Phraates II weighs 68 grains. For the reign of Orodes I the range of the weights may be stated as 60 to 64 grains.

² *Coins of the Arsacidae*, 1892, p. 18 f.; cf. Rapson, *Num. Chron.*, 1893, p. 215.

³ A coin (somewhat worn) of Phraates III, p. 52, no. 64, *infra*, weighs 96·2 grains, and is apparently a *didrachm* (cp. Markoff, *op. cit.*, p. 18, note), if not rather a 'proof' or trial-piece.

weight may be stated as from 9 to 11·3 grains; under Orodes I, 9·7 grains.

The *tetradrachm* was first struck in the period of Mithradates I, but does not appear—to judge from the specimens extant—to have been issued in large numbers till the reign of Phraates IV. In the later reigns (after Phraates IV) there is, apparently, a considerable, though not uniform, deterioration in the quality of the silver. The weight of the earlier tetradrachms seems to range from about 240 to over 250 grains. From the time of Phraates IV there is a diminution in the weight. The tetradrachms of Phraates IV himself vary a good deal (about 220—228 grains): some are very light. Those of his successors may be said to weigh from about 210 to 225 grains. The coins of Volagases IV reach a maximum of 210 or 211, but many specimens weigh less than 200 grains.

§ 4. DATES AND ERA.

Dates appear regularly on the tetradrachms from the reign of Phraates IV onwards. Before this time they occur rarely and sporadically. Some of the later bronze coins—having rather the character of civic issues—bear dates, but the drachms are never dated.¹

The Era employed is the Seleucid, dating from the autumn of B.C. 312.²

The dated tetradrachms usually record the name of the month as well as the year, the months being those of the Macedonian Calendar,

¹ Unless EKP, p. 21, n., *infra*, and ΓΟΣ, p. 66, no. 41, *infra*, are exceptions.

² As to the possible occurrence of the native Parthian Era, see p. 21, *infra*.

which had become known in the East through Alexander's conquests. The year consisted sometimes of twelve, sometimes of thirteen (*i.e.* moons). The place in the year assigned to the intercalary month (*ἐμβόλιμος*) is not known, but the most convenient hypothesis is to assume that it was at the end of the year.

The months are :—

1. Δίος (=October?).
 2. Ἀπελλαῖος.
 3. Αὐδυναῖος.
 4. Περίτιος.
 5. Δύστρος.
 6. Ξανδικός.
 7. Ἀρτεμίσιος.
 8. Δαίσιος.
 9. Πάνημος.
 10. Λῶος.
 11. Γορπιαῖος.
 12. Ὑπερβερεταῖος.
- Ἐμβόλιμος.

The ninth month is written Πάνημος not Πάνημος as

month occurs as Xandikos, but on coins of Pacorus II as **ΞΑΝΘΙΚ(ός)**. Apellaeus is generally written with one λ; Peritius is often **Περίτει(ος)**. Audynaëus is found as **ΑΥΔΝΑΙ(ος)**.

The first month, Dios, is variously reckoned by modern writers as equivalent to August, September or October. But it is probably safest (as M. Th. Reinach has pointed out to me) to regard Dios as identical with October, because the autumnal equinox (about which time the Macedonian year began) is nearer 1st Oct. than 1st Sept., and it is thus likely that in the majority of years the *greater part* of Dios fell in October, not in September.

§ 5. TYPES.

The Parthian coinage in silver presents a comparatively small number of reverse types. On the bronze money the types are much more numerous, but owing, in part, to the smallness of the *flan*, are not often particularly interesting or instructive. The reverse types may best be discussed in connexion with the different denominations on which they occur, while a separate paragraph may be added as to the style and character of the portrait-heads of the obverse.

The Parthian type *par excellence* and the sole type of the drachms (except Pl. iii. 8, &c., Period of Mithradates I; **THE 'BOWMAN' TYPE ON THE DRACHMS.** Pl. xxiv. 2, 7) is the familiar one of the seated bowman. The prototype is, of course, to be found in the Seleucid type of Apollo on the omphalos, yet the exact genesis is somewhat obscure. One would have expected that the earliest Arsacid coin would have been a tetradrachm like that in Pl. iv. 1,¹ exactly reproducing the Syrian original, but

¹ Cp. the tetradrachm of Kamnaskires with Apollo on the omphalos: Gardner, pl. vii. 25.

with the regal portrait and title altered, and that from this coin (and an accompanying drachm) the Parthian coin-type would have been later evolved. But it is hardly possible to assign this tetradrachm to the first king of Parthia. The earliest coins (Pl. i.) are, in all probability, drachms—the tetradrachm denomination being wanting.¹ M. Babelon (*Rois de Syr.*, p. lxiii.) has observed that on the Seleucid coins the Apollo usually holds an *arrow* in his outstretched hand, the bow being lowered in the other. On the Parthian adaptation the arrow disappears, and in the extended hand is held the bow—the pride of the Parthian warrior. This change was perhaps made deliberately, or, it may be that the immediate model was a silver coin of Antiochus I or of Antiochus II, on which the bow, and not the arrow, is sometimes (exceptionally) held in the outstretched hand of Apollo.

The figure substituted for the Greek god is a Parthian warrior, wearing a suit of mail-armour, partly covered by a short² cloak, and a helmet with flaps apparently made of leather,³ and tied with a diadem. The diadem proves that a king is represented, either the “founder” Arsaces, or perhaps the first king, Tiridates I. The head of the figure on the reverse of the drachm is beardless, and remains so throughout the whole course of Parthian coinage. It is

difficult to agree with Eckhel (*D. N. V.*, iii. 545), that the seated bowman was, at all times, looked upon as representing the *reigning* monarch; for (except on the coins of Tiridates I—Phraates I) the Parthian king is almost invariably represented as bearded, both on obverse and reverse (e.g. Pl. xi. 1; xv. 1; xxiii. 8). It would be interesting to know what meaning was attached to the omphalos—whether it was regarded as a mere seat, or was thought, as in the case of Apollo, to be a symbol of divinity. But there is perhaps no positive evidence that either the ‘founder’ or Tiridates I was divinized.¹ At any rate, in the course of the second century B.C. (under Mithradates II) the omphalos was found to be incongruous, and a throne was substituted for it (Pl. vi. 4 and 8). The throne, as Eckhel long ago suggested (*D. N. V.*, iii. 545), probably represents the famous “golden throne” of the Arsacids, which the Romans managed to capture and repeatedly refused to restore. Eckhel well compares with the coin-type the description in Dio (xlix. 27) of Phraates IV receiving the ambassadors of M. Antonius, ἐπὶ τε χρυσοῦ διόφρου καθήμενος καὶ τὴν νεύραν τοῦ τόξου ψύλλων.

The bowman type was not placed upon the tetradrachms till the reign of Mithradates II, the principal type before that period being the seated Demeter (or Tyche), Pl. v. 2, &c., copied from the coins of Demetrius I Soter, of Syria (see B. M. Cat. *Seleucid Kings*, pl. xiv. 1; Babelon, *Rois de Syr.*, p. cxvii. f.).

The standing Herakles² of the period of Mithradates I, Pl. iii. 7,

¹ It is certainly doubtful how far this may be inferred from the interesting passage in Isidore, *Muns. Parth.*, 11:—πόλις δὲ Ἀσακ (in Astauene), ἐν ᾗ Ἀρσάκης πρῶτος βασιλεὺς ἀπεδείχθη καὶ φυλάττεται ἐνταῦθα πῦρ ἀθάνατον. The drachm with ΘΕΟΥ (p. 5, *infra*; p. xxix., *supra*) is perhaps not earlier than Phriapatius.

² Cp. the club behind the head on Pl. ii. 11, and the club as a type of the bronze coins, Pl. viii. 9, xiii. 11, &c.

10, 12, has no exact prototype, though it may have been suggested by some Bactrian coin such as the tetradrachms of Demetrius and Euthydemus II (Gardner, *Greek and Scythic Kings*, pl. ii. 9, iii. 3). We know from a curious passage in Tacitus, *Ann.*, xii. 13, that Herakles was worshipped in Parthian territory in the time of Gotarzes : — *interea Gotarzes apud montem, cui nomen Sanbulos, vota dis loci suscipiebat, praecipua religione Herculis, qui tempore stato per quietem monet sacerdotes, ut templum juxta equos venatui adornatos sistant. Equi ubi pharetras telis onustas accepere, per saltus vagi nocte demum vacuis pharetris multo cum anhelitu redeunt, Rursum deus, qua silvas pererraverit, nocturno visu demonstrat, reperiunturque fusae passim ferae.*

The bowman continues to be the constant type of the tetradrachms till the time of Orodes I, during the progress of whose reign new types begin to make their appearance. After the reign of Orodes II the bowman is no more seen on the tetradrachms. Orodes I, perhaps influenced by the exceptional tetradrachm-design of Phraates III in Pl. xi. 1,¹ inaugurates a type which, with various modifications in detail, remains predominant throughout the whole tetradrachm series. This type represents the reigning king of Parthia, in state (not military) costume, seated on his throne,² and receiving homage

object which may be either the royal diadem¹ or a wreath of victory (*e.g.* Pl. xxiii. 8, 10; *cp.* xxxi. 5). In a few cases a kneeling figure, probably a Parthian subject, accompanies the Tyche (Pl. xxv. 2, 3; *cp.* xxx. 3, 10). On some tetradrachms of Phraates IV (Pl. xix. 9) the place of the Tyche is taken by a helmeted figure, who appears to be the goddess Athena.

The only remaining tetradrachm types are the seated figure of the king holding Nike (Orodes I, Pl. xv. 1, 2; Phraates IV, Pl. xix. 3), and the standing figure of Nike on the tetradrachms of Vonones I (Pl. xxiv. 6). The last-named tetradrachms are accompanied by drachms (Pl. xxiv. 7) bearing, instead of the usual seated bowman, a standing figure of Nike. These types, as the inscription on the drachm proves (p. 145, no. 17 *infra*), have direct reference to a historical event, namely the victory of Vonones over Artabanus III.²

On the bronze coins issued before the reign of Orodes I the fol-

**TYPES
OF BRONZE
COINAGE**

lowing types occur, some of them, or all, appearing in each reign :—

Nike standing.

Horse.

Horse's head.

Pegasos.

Elephant.

Bow in case.

Club.³

¹ *Cp.* the relief of Naksh-i-Rustam, Dieulafoy, *L'art antique de la Perse*, pt. v., pl. xiv.; also the relief, *ib.*, p. 115 : see also Texier, *Descript. de l'Arménie, La Perse &c.*, ii., plates 130, 133, 140, 141, 146, 147, 148 (= "130").

² See *supra*, p. xliii.

³ Under Mithradates III a bull's head and an elephant's head are also found : Pl. xiii. 4, 16.

These constitute, during this period, the stock Arsacid coin-types, but all can be more or less certainly traced to a Seleucid original. The Nike and the club may have no very special significance,¹ and the meaning of the elephant is not obvious, seeing that the Arsacidae (unlike the Seleucids) made no use of this animal in warfare.² But the bow, the horse, and probably the Pegasos, had an obvious appropriateness for a Parthian currency. Justin (xli. 3) says of the Parthians and their horses:—"Equis omni tempore vectantur: illis bella, illis convivia, illis publica ac privata negotia obeunt."³

This series of types ceases to be prominent from the period of Orodes I, who indeed makes use of it, but at the same time introduces many new designs, the number of which is considerably augmented by his successor Phraates IV. Orodes I introduces the *eagle*, or eagle with wreath in its beak, a type which appears in many later reigns, and also (on the coins of Phraates IV) as an adjunct of the obverse. The *star and crescent*, seen as obverse adjunct of many coins of Orodes I, appears as a type of his bronze, Pl. xv. 15—17.⁴ Orodes further introduces the *fortress* (or *gateway*) type (Pl. xv. 13, 14; xvii. 5), also found in later reigns (*e.g.* Pl. xxiii. 4); the figure of a *stag* (Pl. xv. 11; cp. 12), and the *Tyche* of a city (Pl. xvi. 7; cp. 8), one of the numerous civic types which, in later

impressed on *flans* of insufficient size. Some few of these are representations of Greek divinities, and contribute something to our scanty knowledge of the religion of Parthia under the Arsacids. Pl. xxi. 7 represents Athena standing (cp. Pl. xviii. 1; xix. 9). Pl. xxi. 8 is a figure of Dikaiosyne with her scales; Pl. xxi. 9, 10, a head of Helios; Pl. xxi. 11, a triform youthful face, perhaps Hekate;¹ Pl. xxii. 5, Eros.²

The stag (Pl. xxii. 16, 17), the humped bull (Pl. xxi. 16), the horned sheep (Pl. xxi. 18, and see p. 223, n. *infra*), and fish (Pl. xxii. 8) are of interest. Among the miscellaneous types are the curious symbol ♀ (Pl. xxiii. 5; xxix. 13; xxxv. 3—6; p. 188, note *infra*; and see Drouin, *Rev. Num.*, 1895, p. 63 f.); kantharos, grapes and ears of corn, and eagle, amphora and grapes (Pl. xxii. 18). The type of ΒΟΥΛΗ (Pl. xxvi. 6—8), on coins of Vardanes I, has been already noticed (p. xlv., *supra*) as probably referring to the Senate of Seleucia.

Gotarzes (Pl. xxvii.—xxviii.) rivals Phraates IV in the variety of his types. They may be classified as follows:—i. Divinities. ii. Types relating to the Tyche of a city. iii. Types relating to the king. iv. Animals, birds, &c.³ v. Various inanimate objects (amphora, &c.). Even in these series, types of divinities are not very prominent. Apollo, Athena, Nike and Artemis occur. The last-named goddess was probably of importance in Parthia, judging

¹ Gardner, p. 43, no. 17, calls this type a "janiform male" head, but it is undoubtedly a *triple* visage, and, being beardless, may be female.

² See also Pl. xxv. 10.

³ Pl. xxviii. 3 represents a griffin's head, originally a Seleucid coin-type. The supposed "*proue de navire*" in Markoff's *Cat. des monn. Arsacides* (de l'Institut des langues Orientales), St. Petersburg, 1889, p. 30, no. 479, pl. i., 497, is really a griffin's head.

from the frequent mention of temples of Artemis and Anaitis in the lists of Isidore of Charax (*Mans. Parth.*).

In the later reigns the types become less numerous. Athena is represented on coins of Volagases I (Pl. xxix. 8), and Zeus (?) on those of Vardanes II (Pl. xxix. 17, 18). The bust or figure of the Tyche of a city, probably Seleucia, now becomes very common (Pl. xxxi. 14; xxxii. 4; xxxiii. 1—5, &c.). The remaining types are chiefly representations of animals, more especially under Mithradates IV (Pl. xxxiii.).¹

A survey of the whole series of Parthian reverse-types shows that they emphasize a few features of the national life, more especially the magnificent state of the Arsacid monarch and the important position of the Hellenic cities of his empire. Upon the religion of Parthia they throw but little light. In the case of the majority of these types there is no question of art—in the sense of fine art—and the bowman type of the drachms is throughout executed in the rudest and most mechanical fashion.² The portrait-

<p>PORTRAIT HEADS ON OBVERSE.</p>	<p>heads of the obverse, on the contrary, display in many cases a fair measure of artistic skill and feeling. In order, however, to do justice to the artist it is necessary to eliminate the many unintentional caricatures</p>
--	--

portrait of Artabanus I seen in Pl. v. 1, 2, 4. Pl. vi. 3, 4 rather distort the remarkable head of Mithradates II as seen in Pl. vi. 1, 2. So, again, the *vera effigies* of Orodes I has to be selected with some discrimination from the numerous coins—executed with every degree of skill and care—on Plates xiv.—xviii. On the later coins the drachm portrait is obviously treated with much greater conventionality than the portrait that appears on the corresponding tetradrachms.

The king's head in profile turns to the *left*, except in the period of Mithradates I and on the tetradrachms before Mithradates II. The usual direction of the head on Greek regal coins is to the right. The head is represented completely facing on coins of the unknown king (Pl. xii. 1) and Artabanus III (Pl. xxv. 5, 6), both interesting and probably characteristic heads. Vardanes II and Volagases IV also appear full face (Pl. xxix. 15; xxxv. 7, 9).¹ The head of a queen is seen on Pl. xxiv. 1—4 in the person of Musa, and a queen is no doubt represented on the bronze coin of Gotarzes, Pl. xxvii. 18.

The king invariably wears the diadem, and usually a cuirass, (sometimes richly ornamented, *e.g.* Pl. xviii. 17; xix. 9), and a necklace which often terminates in the forepart of a winged monster. On a few specimens this terminal ornament has some resemblance to a griffin, on others to a sea-horse (pp. 90—93 *infra*), but perhaps a Pegasus is usually intended.² The earring is also frequently worn, according to Oriental custom:—

Natus ad Euphraten, molles quod in aure fenestras
Arguerint, licet ipse negem.

Except on the early 'beardless' class, the head is bare till the

¹ Pl. xxviii. 12 shows a bust to the front with the head turned l.

² The griffin or griffin's head is sometimes seen as a type: the Pegasus is a frequent type on the bronze.

latter part of the reign of Mithradates II, when a helmet, or it may be a ceremonial tiara, is introduced (Pl. viii. 1—3). This appears also on the coins of Sinatruces (Pl. x.) and on those of Phraates III (Pl. xi.). The device of the helmet is generally either a star or a horn. In the latter case the helmet has a decorative edging formed by the fore-parts of stags (Pl. xi.). The horn is familiar as an Eastern symbol of material power.¹ The stags perhaps proclaim the prowess of the king as a hunter.² Long disused on the coins after the reign of Phraates III, the helmet reappears on those of Vardanes II (Pl. xxix. 15—18)³ and Pacorus II (Pl. xxxi. 1—4), and is worn by Osroes and by most of the latest Arsacids.

A peculiarity of many Parthian portrait-heads remains to be noticed, namely, the occurrence of a wart on the king's forehead or temple. It is first seen on the head of Orodes I (Pl. xiv. 12; xvii. 8), and afterwards on the head of his son Phraates IV. It is found on many later kings, so that it seems to have been regarded as a distinctive dynastic peculiarity, like the anchor which was supposed to appear by nature on the thigh of the genuine descendants of Seleucus Nikator.⁴ In the case of Gotarzes, a lock of hair seems to take the place of the wart that characterizes his rival Vardanes I (Pl. xxvi. 13, 1; and *supra*, p. xlviii).⁵

¹ See Babelon, *Rois de Syr.*, p. xviii., 'Les types cornus.'

² A triple spray appears as the device of the helmet on Pl. xi. 14, 15. This is found also on a king's helmet in the series of the coins of Persis.

³ It is seen also on rev. of Pl. xxvii. 17 (Gotarzes).

⁴ See Babelon, *Rois de Syr.*, p. vii. The wart, or rather tuft of hair, meeting between the brows, seen on Buddhistic monuments is to some extent parallel: see e.g. A. Grünwedel, *Buddhistische Kunst in Indien* (Berlin Museum), 1900, figs. 72, 73, 76.

⁵ It is doubtful whether there is any significance in the ringlet that appears on the temple of Volagases II (Pl. xxxii 6—14) and his successors.

§ 6. EPIGRAPHY.

Lindsay (*Coinage of the Parthians*, pl. ii.) and Markoff (*Monn. des rois Parthes*, plate) have drawn up tabular lists of the many strange forms of letters found on Parthian coins.¹ These varieties would be of more importance were they forms and spellings more or less deliberately adopted by a Hellenic engraver: it is obvious, however, as Eckhel long ago observed (*D. N. V.*, iii., p. 543), that in most cases they are merely due to the blunders of a native workman ignorant of Greek. If the legends of the later drachms do not entirely lapse into barbarism (*i.e.* a meaningless combination of letters), it is because there is a sort of conscientiousness on the part of the engraver in copying the coins of his predecessors. He furnishes at least an adumbration of the inscription intended, though he stereotypes correct and incorrect forms with complete impartiality.

To give a few instances:—the word ΔΙΚΑΙΟΝ on the drachms is constantly written ΔΙΧΑΙΟΝ, but here Χ is probably not due to a confusion between χ and κ, but is a form derived from a carelessly written Κ. Χ would be the more readily adopted because it is actually the form that the Pehlvi letter ‘m’ assumes on some of the coins. The same form Χ is made to represent Ν in the word ΦΙΛΕΛΛΗΝΟΣ, which is persistently written ΦΙΛΕΛΛΗΧΟΣ. Again, ΑΡΣΑΚΟΝ is often written ΑΡΣΑΝΟΝ, Ν being probably the outcome of a badly formed Κ. Many other letters betray the hand of a slovenly or lazy workman, who makes Ι or ∷ do duty at times for Α, for Ε, for Σ, for Ρ, and for Υ. These peculiarities

¹ The Pehlvi letters (which appear for the first time on the coins of Volagases I) are given in Markoff, *op. cit.*: cp. Drouin in *Rev. Arch.*, ser. 3, tom. iv., 1884, pl. v.

are chiefly characteristic of the drachms. The letters of the tetradrachms do not present the same errors, and the spelling is usually, though not invariably, correct.¹

The following forms may be noticed, but they do not generally include cases of the ignorant substitution of one letter for another, already noticed, and often pointed out in the text (*e.g.* p. 150, *infra*).

- A** **Α**; **Α**; **Α**; **Λ**.
- B** **Β** on later drachms (see *e.g.* p. 165, note 2, *infra*); **Β** on later tetradrachms.
- Γ** **Γ**. or **Γ** on some later drachms, see note, p. 217, *infra*.
- Δ** **Δ** on some later tetradrachms (Pl. xxv. 3, xxxii. 10).
- M** has often nearly the appearance of **Π**.
- O** **Ο** frequently; on later tetradrachms **Ο**; sometimes **•** (p. 99f., *infra*).
- Π** **Π** on some tetradrachms of Volagases III.
- Σ** on later drachms often **Σ**; on later tetradrachms **Σ** (or **Σ** hardly to be distinguished from **Σ**). A peculiar form **Σ** on p. 66, *infra*.
- Υ** frequently **Υ**, especially on the drachms.
- Φ** often **Φ**.
- Ω** **Ω** on the earliest drachms (Pl. i.); on later tetradrachms **Ω** and **Ω**.

where the majority of the specimens were issued. It is unfortunate that the external evidence is, at least at present, of very little service; for we lack published analyses of large hoards of Parthian coins, and are as a rule only vaguely informed as to the *provenance* of individual specimens. We are thus practically confined to an examination of the coins themselves, which at all periods bear a number of monograms and letters which, it might seem, should give a clue to the place of issue.

Markoff, in his *Monnaies des rois Parthes* (Paris, 1877, part 2, p. 41 and plate), has compiled a table of 112 different monograms and letters, and also a list containing the names of about the same number of towns which he supposes the monograms and letters to indicate. His system of identification, however ingenious, gives rise to many doubts, for, in the first place, it involves the large assumption that *all* the monograms and letters indicate the names of places (not of persons &c.), such names, in nearly all cases, being represented (according to him) by their initial letter or letters (*e.g.* K=Ctesiphon; HP=Heraclea). There is, further, the difficulty that most monograms can be read in more ways than one; for example, $\overline{\text{A}}$ the commonest monogram on Parthian coins, may be read TA, AT, or TAT, and such a monogram as $\overline{\text{P}}$ need not necessarily be explained—as Markoff explains it—as part of the town-name ‘Tigranocerta.’ An entirely different course is taken by Prof. Gardner (p. 23), who, except in a very few cases, declines to attempt the identification of the monograms as place-names:—“To suppose that a monogram in the field of a coin usually represents the name of the mint whence it was issued, is to go altogether beyond the evidence. M. Chabouillet is clearly right in saying that the monograms are usually merely the private marks of a magistrate or a contractor, and not intended to be decipherable to anyone except himself. But even if they did contain

suburb on the eastern bank of the river, became the winter residence. From the time of Orodes I, if not earlier, Ctesiphon was certainly regarded as the capital.¹

The bronze coins of Class I. (Pl. ii.) are of unusual fabric (with bevelled edges) and size. The evidence² of their Bactrian origin is not strong, and they may perhaps have been struck in Media (Ecbatana?). On some drachms,  (Prokesch) and  occur (also  on *obv.* Æ. Imhoof).

The drachms of Class II. (Pl. iii. 2, 3, 4) are without monograms. In style and fabric they a good deal resemble the "beardless head" drachms (Pl. i.), and it is possible that, like the latter, they were struck in a city (? Hecatompylos) in the north of the Empire.

Class III. (Pl. iii. 7—13), issued in the last years of the reign of Mithradates I, is of flat fabric and differs from the ordinary Parthian coinage. The tetradrachms and drachms bear the monograms ; ;  (tetradr., Markoff); others without monogram. Gardner (p. 24) has in this case ventured to interpret these monograms as town-names, namely Charax, Artemita, and Phylace. Yet the coins resemble one another so closely that I cannot think it likely that they were minted (during the short period of two or three years) at three distinct cities.

Phraates II. *Drachms*:—on *obv.*, ; ; NICA (Markoff);
PHRAATES II NICAΚ; CVΛΣ and blundered varieties; TAM;
AND MH and club (Prokesch, p. 6); ΕΠΑ[P] (Markoff);
ARTABANUS I. MH (*rev.* Φ; Prokesch, p. 6).³

¹ Ammianus (xxiii. 6, 23) calls Pacorus its second founder. Some writers suppose this to be Pacorus II, but no doubt Pacorus I (son of Orodes I) is meant (Gutschmid, p. 97). The first mention of Ctesiphon occurs *circ.* B.C. 220.

² See *supra*, §2, 'Coins of the period of Mithradates I.'

³ On the tetradrachm assigned to Phraates II (Pl. iv. 1) BA or BΔ occurs.

Artabanus I. *Drachms*:—on *obv.*, PA; MAT (Markoff; ? NAI or NAT); ⚡ (Prokesch); ⚡ (*rev.* EKP).

The drachms of these two kings present various points of resemblance, notably the appearance of part of a word on the obverse. These words—with more probability than usual—have been read by several numismatists as names of places:—TAM=Tambraca in Hyrcania; NICA=Nisaea in Margiana (Markoff); CVΛΣ &c. =Syrinx in Hyrcania; PA=Rhagae; MAT is completed by Markoff as *Ματινηή*, the Median province (cp. note *infra*, p. 21). The best executed drachms of Phraates II (in respect of the obverse) are those marked A and R (Pl. iv. 4, 5). Those inscribed NICKA, CVΛΣ, TAM, &c., are of ruder work (Pl. iv. 6, 7). The drachm of Artabanus I (Pl. v. 7) with ⚡ was probably struck at the same mint as that with PA (Pl. v. 5).

The tetradrachms of Artabanus I (Pl. v. 1, 2)¹ are of fine work, but not finer—at least as regards the portrait-head—than the drachms. If the drachms were really struck at Rhagae (PA), the tetradrachms were in all probability struck there also; but a

HIMERUS: comparison with the tetradrachm of Himerus(?) (Pl. v. 9) may suggest as an alternative mint the important city of Seleucia, where it is, on historical grounds,

On the reverse of the tetradrachm the following monograms, &c., occur:—

- (i.) in ex., **TV**; in field, palm-branch.
- (ii.) in ex., **TV** (no palm-branch).
- (iii.) in ex., **TV** and **Π(†)**; behind, **℞**; in field, palm-branch (Collection of Col. Allotte de La Fuye).
- (iv.) behind, **℞**; in field, palm-branch.
- (v.) in ex., **KA**; in field, **⌘**, **OP(†)**, and palm-branch. (Hermitage, Markoff, *Coins of Arsacidæ*, pl. iii. 12).
- (vi.) (No monogram); in field, palm-branch.

It will be noticed that the palm-branch is almost invariably present, and may perhaps be the indication of the mint, the monograms and letters being magistrates' or moneyers' marks. It is, at any rate, practically certain that **℞** and **TV** cannot each indicate mint-places, because, though they are found singly on (iv.) and (i.), they occur *in combination* on no. (iii.), thus proving that one at least must be a magistrate's or moneyer's mark. **TV** we have already found on the tetradrachm of Himerus (?), Pl. v. 9.

Monograms and letters on the drachms and bronze of Class I. are very numerous, but on Class II. (head without helmet), are hardly ever seen.¹ A good many varieties in Class I are described in this Catalogue (p. 25 f.), and it will be noticed that **AP** is of frequent occurrence on the drachms and **MI** on the bronze. **MI** is certainly suggestive of 'Mithradates,' but we know of no town of importance that was called by his name. The style and fabric seem to indicate that the whole series of coins was struck at a very few mint-places, possibly even at one central mint (Seleucia or Ctesiphon). The monograms are doubtless those of monetary magistrates, or may

¹ On the obv. of the bronze, no. 131, p. 36, *infra*, **⌘P** occurs.

possibly, in some cases, indicate *officinae*; thus **MI** (cp. **Ṣ**, p. lxxxv. *infra*) might be conjectured to be the 'Mithradatic' *officina*.

Eight or more monograms occur on the tetradrachms of Artabanus II (Pl. viii., ix.). The drachms and bronze **ARTABANUS II.** are without letters, but some rare drachms bear the inscriptions **ΑΡΕΙΑ**, **ΜΑΡΓΙΑΝΗ**, **ΤΡΑ(Ξ)ΙΑΝΗ**, already noticed, *supra*, p. xxxi. and *infra*, p. 40 n. Specimens of the tetradrachms occurred in a find near Bagdad,¹ a possible indication that they were issued in the south-west of the Empire (at Seleucia or Ctesiphon).

The coins of Sinatruces (Pl. x.) are without monograms, &c., **SINATRUCEs.** except one tetradrachm which has **A**. A specimen of this was found at Bassora.²

As already pointed out in § 2, p. xxxiii. *supra*, the drachms of several **PHRAATES III** kings subsequent to Sinatruces are marked by numerous monograms and letters, the number of **AND** varieties being greatest under Orodes I. The **LATER KINGS.** monograms **Ṛ**, **Ṣ**, **Ṛ^p** (or **Ṛ^p**), **Σ^p** and the letter **K** are especially noteworthy, because they often recur, and are all found on the coins of Phraates III, the Unknown King, Mithradates III, Orodes I. and Phraates IV.³ From their occurrence

each of the four monograms into the name of a place that is likely to have possessed a mint. **K** and the four monograms, therefore, probably represent the *officinae* of some important city of the empire, probably Ctesiphon. **M** would seem to indicate the name "Mithradates," and there may have been (as already suggested) a "Mithradatic" *officina*, called after one of the two great kings of this name.¹

Α is specially important, because it appears not only on the drachms of the reigns Phraates III—Phraates IV, but also (usually) on the bronze money, being, in fact, almost the only monogram found on the coins of this metal.² It once occurs (**Æ** of Phraates IV, Pl. xxi. 20) as a *type*. Under Phraataces it begins to be represented as **Α**, and from that reign till the fall of the Arsacid kingdom is never absent from the drachm-coinage. And it may be said, also, that from the time of Volagases I hardly any other monogram occurs. **Α** (or **Α**) does not seem to yield the name of any city likely to have been an important mint-place for a lengthy period. The most probable mint for the coins is, indeed, Seleucia or Ctesiphon.³

¹ There is some reason to suppose that certain abbreviations of names on the coins of Athens represent the *names* of different *officinae*, which were called after gods, heroes, and famous personages; 'Ισιδ(ος), Σολ(ών), &c. (Babelon, *Traité*, i., p. 840).

² To give more exact details as to the bronze coinage:—**Α** marks the bronze (Class I.) of Phraates III, and is the almost invariable monogram on the bronze of Orodes I, Pacorus I, and Phraates IV (Orodes I has sometimes **Π**; Phraates IV has sometimes **Ρ**, a monogram which is seen as the *type* of a bronze coin struck by him, Pl. xxiii. 6). Vonones I and Artabanus III have **Α**. Vardanes I, Gotarzes, Volagases I, are often without monograms (but **Ρ** and **Π** occur on Gotarzes; **Α** on Volagases I), and from the time of Pacorus II the appearance of monograms and letters on the bronze is only exceptional.

³ Any interpretation of the monogram can hardly be more than a guess, yet as it does not apparently give the initial letters of a town, it is possible that it

Adjunct symbols—especially a star and crescent—characterize the varied issues of Orodes I and Phraates IV

**ADJUNCT
SYMBOLS.** (drachms and bronze). One of these, the eagle holding a wreath, has been already referred to (§ 2, 'Phraates IV'), but the curious symbol, Pl. xvii. 7—14; xviii. 4, (and p. 90, note 1) must be noticed. Though assuming various forms, it seems certainly to be meant for an *anchor*.¹ A similar object appears as the sole adjunct on the drachm in Pl. xi. 14, 15 assigned to "Phraates III or a contemporary." The anchor is familiar as the distinctive 'crest' of the Seleucidae, but it also constantly occurs (often in conjunction with crescent and star) on the coins issued by the Kamnaskires dynasty of Elymais (Susiana) in the first century B.C. and later (see A. de la Fuye, *Rev. Num.*, 1902, Pl. v.), and seems, therefore, to have been a badge of this dynasty also. Perhaps the coins of Orodes I bearing this symbol were intended to have currency in Elymais, or at least to emphasize his suzerainty over that kingdom.

In the reigns that follow Phraates IV the monograms become less frequent. The drachms of Phraataces have ; Vonones I, ;  (Markoff); Artabanus III, ; ; .

From the time of Vardanes I onwards $\overline{\Lambda}$, as has been already observed, is almost the only monogram that appears on the coins. Except in the case of barbarous specimens, Ctesiphon may be regarded as the most likely mint-place of the later Parthian money. The new city Volagesias or Volagesocerta, founded by Volagases I near Seleucia, may, however, have been one of the later mints. Hyrcania and the northern dominions, probably from the reign of Volagases I, ceased to be held, or were held but loosely, by the Arsacids, and it is therefore unlikely that the later coins were issued in the cities of the north.¹

Some of the peculiar bronze coins of Volagases III (Pl. xxxv. 3—6) were probably struck at Edessa : see *infra*, p. 236.

In concluding this Introduction, it should be stated that the following works, frequently referred to in the Catalogue are, for brevity, cited by the author's name only :—

LONGPÉRIER, A. de, *Mémoires sur la chronologie . . . des Rois Parthes Arsacides*. Paris 1853—1882.

PROKESCH-OSTEN, *Les monnaies des rois Parthes*. Paris, 1874—1875.

GARDNER, Percy, *The Parthian Coinage*. London, 1877.

RAWLINSON, G., *The Sixth Oriental Monarchy*. London, 1873.

GUTSCHMID, A. von, *Geschichte Irans*. Tübingen, 1888 (ed. Nöldeke).

¹ On the letters or numerals on the tetradrachms of Pacorus II, and later kings, see *infra*, p. 193, note.

While arranging and writing the descriptions of the coins contained in this volume, I have had the great advantage of frequently consulting my colleagues Mr. Rapson and Mr. Hill, and I am also highly indebted to Mr. Barclay Head who (with the assistance of Mr. Hill) has revised the proof-sheets of the entire work.

10	60·7	behind, Α	in ex., ΕΚΡ [Acquired in 1841. ³]
			Pl. V. 7.

¹ Markoff (*Coins of the Arsacidae*, St. Petersburg, 1892, p. 10, no. 6; pl. iii. 6) publishes a similar drachm with three letters on the obverse, possibly NAI or NAT, or, as he prefers to read them, MAT, seeing therein the name of the Median province *Ματινη*. Cp. Rapson in *Num. Chron.*, 1893, p. 207.

² M has nearly the form Π, and so frequently on Parthian coins.

³ A similar specimen is in the Berlin Museum (Prokesch, p. 6; pl. i. 6). Gardner (p. 27), who considered the letters ΕΚΡ to be a date, namely, year '125' of the Seleucid Era = a.c. 188-7, assigned this drachm to Phriapatius. The subsequent publication of the tetradrachms dated '188' renders it almost certain that ΕΚΡ is not a date, or, at any rate, not a date of the Seleucid Era. Rapson (*Num. Chron.*, 1893, p. 212) has ingeniously suggested that ΕΚΡ may be a date of the native Parthian Era, "the starting-point of which was 249-8 B.C. . . . The date on the drachm, 125, would, in this Parthian Era, correspond to 124-3 B.C., practically the same date as that of the tetradrachm." But there is no other known instance of the use of this era on Parthian coins, nor is it likely that two different eras would be employed simultaneously on the tetradrachms and drachms.

<p>MITHRADATES II, B.C. 123—88.</p> <p>The main divisions of this extensive coinage consist (I) of the specimens showing the king's head without helmet; (II) of those with the head in helmet. In Class I are two subdivisions, (α) with inscription ΒΑΣΙΛΕΩΣ; (β) with inscription ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ. It will be noted also that in Class I the bowman on the drachms sits at first on the omphalos (inscr. ΒΑΣΙΛΕΩΣ), and afterwards on a throne (inscr. ΒΑΣΙΛΕΩΣ and also ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ).</p> <p>In Class II the inscription is always ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ, and the bowman sits on the throne.</p> <p>CLASS I.—Head without helmet.</p> <p>(α) With ΒΑΣΙΛΕΩΣ.</p> <p>Tetradrachms.</p> <p>Sizes 1·3—1·2</p> <p>Bust of Mithradates II l.; pointed beard; wears diadem, spiral necklace with terminal ornament, and cuirass: border of dots.</p> <p>1. ΒΑΣΙΛΕΩΣ, above, ΜΕΓΑΛΟΝ, r. ΑΡΣ ΑΚΟΝ, in ex., ΕΠΙΦΑΝΟΥΣ Arsaces seated r. on omphalos, holding bow.</p> <p>behind, Α; in field r., palm-branch. [Montagu sale, March, 1896, lot 766.]</p> <p>Pl. VI. 1.</p> <p>2. (ΑΡΣΑ ΚΟΝ); in ex. (2nd line), TV [Lubicz.]</p> <p>Pl. VI. 2.</p> <p>in field r., palm-branch. [Subhi.]</p>

		Bust of Mithradates II l., as on no. 102. (portrait varied.) ¹	ΒΑΣΙΛΕΩΣ, r. ΒΑΣΙ ΛΕΩΝ ΑΡ ΣΑΚΟΝ, in ex., ΔΙΚΑΙΟΝ, l. ΕΥΕΡΓΕΤΟΝ ΚΑΙΦΙΛ ΕΛΛΗΝ Arsaces seated r. on throne, holding bow.
117	62.6		(ΒΑΣ ΙΛΕΩΝ)
Pl. VIII. 4.			
¹ Nos. 117—120 differ somewhat on the obverse from the ordinary drachms of Mithradates II, and the reverse legend is peculiar, as Gardner has noticed (p. 31). <i>Δίκαιος</i> does not, indeed, recur on the coins till the time of Mithradates III, but <i>εὐεργέτης</i> and <i>φιλέλλην</i> occur on those here assigned to the next king (Artabanus II). There does not seem to be any strong reason, therefore, why nos. 117—120 should not be regarded as a variety of the coinage of Mithradates II.

II.—LATER COINAGE.			
Tetradrachms.¹			
Sizes 1.25—1.1			
		Bust of Orodes I l.; close beard; hair flowing; wart on forehead; wears diadem, spiral necklace with projection, and cuirass: border of dots.	<p>ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ, Γ. ΑΡΣΑΚΟΥ ΕΥΕΡΓΕΤΟΥ, in ex. (first line), ΔΙΚΑΙΟΥ, Γ. ΕΠΙΦΑΝΟΥΣ ΦΙΛΕΛΛΗΝ ΟΣ Orodes I, seated r. on throne, raises the right arm of Tyche of City, who kneels on one knee before him. The king wears tunic and loose trousers; Tyche wears chiton and turreted head-dress, and holds in l. sceptre.</p>
30	226.6	rosette and leaf ornament on cuirass. ²	<p>in field, ΤΟΤ (restruck on another Parthian tetradrachm; on <i>rev.</i> traces of former inscription and of the type, hand r. holding bow; cp. <i>e.g.</i> tetradrachm of Orodes I, no. 1 <i>supra</i>. [Merzbacher.]</p> <p style="text-align: center;">Pl. XIV. 10.</p>
31	241.2	rosette and leaf ornament on cuirass.	<p>in ex., ΠΕ (Peritius); in field, ΤΟΤ [Merzbacher.]</p> <p style="text-align: center;">Pl. XIV. 11.</p>
		Bust of Orodes I l.; close beard; hair flowing; wart on forehead; wears diadem, spiral necklace with projection, and ornamented cuirass: border of dots.	<p>ΒΑΣΙΛΕΩΣ, &c., as on no. 30. Orodes I, seated r. on throne, receives palm-branch from Tyche of City, who stands before him. The king wears loose trousers and tunic; Tyche wears chiton, peplos, and turreted head-dress, and holds in r. palm-branch, in l. sceptre.</p>
32	194.8		<p>in ex. (2nd line), ΔΥ (?) (Dys-trus ?) [Bank of England gift.]</p>

¹ On the attribution, see Introduction, § 2, under 'Orodes I.'

² The youthful appearance of the head on no. 30 is due only to the imperfect representation of the beard, through mis-striking.

Vt. or Size.	Obverse.	Reverse.	Date.
36·5		in ex. (2nd line), ΞΑΝ (Xandicus) and part of monogram. [Merzbacher.]

Pl. XX. 2.

¹ These tetradrachms have various affinities with the dated tetradrachms of Phraates IV of '285' and '286.' Cp. also the tetradrachm of '286' attributed (*infra*) to "Tiridates II?," where the Tyche holds a sceptre instead of the usual cornucopiae. The date '279' read by Longpérier (p. 55; pl. x. 1) on a specimen of no. 52 seems doubtful.

No.	Wt. or Size.	Obverse.	Reverse.

81.		<p>behind Tyche, ЦΠΣ; in field, centre, ΔΑΙ and pellet. [Hooper.]</p>	<p>286 = B.C. 26</p>
		<p>Pl. XXIII. 9.</p>	
	<p>¹ No. 2 was published by Gardner, p. 44, pl. iv. 18 (followed by Gutschmid, p. 103), as bearing the date 285=B.C. 28/27. The inscr. ΦΙΛΩΡΩΜΑΙΩ is not visible on this specimen. The reading and date are much clearer on no. 1, and I have compared both coins with similar specimens in the Von Petrowicz collection kindly communicated to me by their owner.</p> <p>The attribution of these tetradrachms (which are not accompanied by drachms or bronze) cannot be regarded as certain. They belong to two months of year 286=B.C. 27/26, in the earlier and later months of which Phraates IV was striking tetradrachms. The head on 1 and 2 differs a good deal from the head found on the coins of Phraates IV of year 286 and other years, and the inscription, especially the word ΦΙΛΩΡΩΜΑΙΩ, is most unusual and unsuited to Phraates, at any rate at this period of his reign. The coins would seem then to be of a usurper or a rival king, and Tiridates II—whose exact date, however, is disputed by modern chronologers (see 'Introduction' under 'Phraates IV')—has the most obvious claim, as has already been suggested by Cunningham, Gutschmid, and Von Petrowicz. The tetradrachms assigned to Tiridates by Gardner (pl. iv. 19) have been attributed in this <i>Catalogue</i> to Orodes I (see 'Introduction,' § 2, under 'Orodes I').</p>

¹ A coin of year **BNT** = 352 = A.D. 40/41 is published by Prakesch, p. 52; pl. iv. 38.

² The letter **K** and a star were probably on all, or nearly all, the dies of the tetradrachms of Gotarzes. But they are frequently off the flan, as was the case with the **A** and star on the tetradrachms of Vardanes I.

³ **M** has the form **Π**.

Drachms.			
Sizes .9—·7			
33	52·5	Bust of Gotarzes I., with long beard and flowing hair; wears diadem, earring, spiral necklace, and cuirass: border of dots.	[BA]CΛIE[ΩC] ^(sic) BACΛI EWN ^(sic) , r. AP CAKON; in ex., VOCKEKAL OYME NOCA, l. PTABANOV ΓΩ TEPZH ¹ Arsaces seated r. on throne, holding bow. in front, Α [C. J. Ready.]
Pl. XXVII. 2.			
34	59·4	Bust of Gotarzes I., as on no. 33: border of dots.	BACIΛEΩC BACIΛEΩN, r. AP CAKON; in ex., ENEP ΓETOY ΔIKAION, l. EΠIΦ ANONC ΦIΛEΛΛHNOC ² Arsaces seated r., as on no. 33. in front, Α
35	57·7		,, ,, [Cunningham.]
36	55·6		,, ,, [Cunningham.]

¹ APCANOY is written for APCAKON, and K: KALON ΠENOC for KEKALONMENOC. The reading and rendering of this inscription proposed by Gutschmid, *Gesch. Iran.*, p. 123, are fantastic: cp. *Nunt. Chron.*, 1900, p. 95. The legend on the drachms as given by Gardner, pl. v. 25 and pl. v. 26, should be corrected by reading BACIΩC instead of BACIΛEYΣ, and by inserting the word APCAKON after BACIΛEΩN. On this inscription see further 'Introduction,' § 2, *supra*, 'Vardanes I., and Gotarzes.'

² The inscription may be more exactly given as BACIΛEΩC BACIΛEΩN APCANOC: NEΓETO ΔIKAION: ΠI+ANONC +IΛ: ΛHNOC. The letters on nos. 34—37 are somewhat larger than on nos. 38—40. No. 34 has BACIΔE.. BACIΛEΩN. B here and on the other drachms has the form □.

No.	Wt. or Size.	Obverse.	Reverse.
37	50·		in front, $\overline{\Lambda}$ [Cunningham.]
38	55·5	on cuirass, star.	„ „ (legend double-struck). [Woodhouse gift.]
Pl. XXVII. 3.			
39	58·		in front, $\overline{\Lambda}$ [Payne Knight bequest.]
40	53·		in front, $\overline{\Lambda}$ (BACIAEΩC repeated) [Presented by Mr. W. T. Ready.]
41	54·2		in front, $\overline{\Lambda}$ [Lubicz.]
42	61·		(T. Combe, <i>Vet. pop. num.</i> , p. 232, no. 5.)
43	57·		in front, $\overline{\Lambda}$ [Woodhouse gift.]
44	58·2		„ „ [Presented by Mr. John Disney.]

No.	Wt. or Size.	Obverse.	Reverse.
48	55.5		(legend and type similar to no. 47) in front, N [Cunningham.]
49	50.6 bronze		(unintelligible legend) in front, N (or NI ?).
50	53.1	in front, crescent and star. ¹	(unintelligible legend) in front, N (imitated from N) 
Pl. XXVII. 5.			
51	57.7	in front, crescent and star.	(unintelligible legend) in front, NI
52	58.4	in front, crescent and star.	(legend represented by dots) in front, NI [Rawlinson.]
53	51. bronze	in front, crescent and star.	(legend represented by dots) in front, A (imitated from A)
54	51.8 bronze	in front, crescent and star.	(legend represented by dots) in front, A [Benlian.]
Pl. XXVII. 6, rev.			
55	50.3 bronze	in front, crescent and star.	(AΠ , &c., legend unintelligible) in front, Π
Pl. XXVII. 7.			
56	46.4 bronze	in front, crescent and star.	(similar legend to no. 55) in front, Π

¹ The presence of the crescent and star, and the rude style of nos. 50—56, differentiate them from the other drachms of Gotarzes. In particular, the reverse of nos. 55, 56 resembles the reverses of coins of Sanabares described in Gardner, *Greek and Scythic Kings of India*, 'Sanabares,' nos. 2—4.

78	·45		
			Pl. XXIX. 9.
79	·55		

Pl. XXIX. 10.

¹ As the oblong or square border of the reverse is found also on the \mathcal{A} of Vardanes I and Gotarzes, it may be useful to recall the fact that the long beard of Gotarzes on drachms and \mathcal{A} is not pointed but cut straight, and that Vardanes I has a short beard, not distinctly pointed.

² The figure has been called the 'king,' but this seems somewhat doubtful, as he wears only a short tunic, while the sacrificer (undoubtedly the king) on \mathcal{A} of Gotarzes, Pl. xxvii. 21, wears helmet and flowing dress. Perhaps some divinity may be intended, as on \mathcal{A} of Artabanus III, Pl. xxv. 10, where the sacrificer is a winged Eros.

2	184·2	<p>behind head, Α</p>	<p>in field, ΘΠΤ; in ex. (2nd line), [Ξ]ΑΝΘΙΚ [Cunningham.]</p>	<p>389 =A.D. 78</p>
<p>¹ Letters, or rather, probably, numerals, appear on the obverses of the tetradrachms of the later kings, as follows:—Pacorus II, Α, Β, Γ, Δ, Ε; Volagases II, Α, Β, Γ, Δ, Ε; Volagases III, Α, Β; Volagases IV, Α; Volagases V, Β. These numerals cannot be marks of value, and it is highly improbable that they give the names of mint-places. Longpérier (p. 121) suggests that they indicate the <i>officinae</i> in which the coins were struck; but the whole series has hardly yet been studied with sufficient minuteness.</p>

				= 107
Pl. XXXI. 7.				
<p>¹ The attribution of nos. 1 and 2 is not entirely satisfactory. In date, they fall within the reign of Pacorus II, but they differ so much from his known coins that they can hardly be his. Gardner (p. 54) assigns them to Osroes, suggesting also the possibility of their belonging to some unknown rival king of the period. The attribution to Osroes is probably the simplest, though it will be noted that these coins differ from those struck from the year '421' onwards, which are always distinguished by the great bunch of hair behind the king's head.</p>

Pl. XXXIII. 2.				
18	-7	(helmet with spiked appendages and hooked device) behind, B; in front, ΔKY	in front, Π [Claude Stewart.]	424 = A.D. 112/13

¹ Gardner (p. 56) assigns this series to this Volagases ("III"), or, as an alternative, to Osroes, though without commenting on the fact that the king has here a long pointed beard (instead of a close or very short beard), and that the helmet differs in form from that seen on the tetradrachms, drachms, and bronze. But these seem to be difficulties (though possibly not insurmountable) in the way of the attribution to Volagases II. An examination of the dates shows that these coins cease long before the end of the reign of Volagases II (as indicated by the tetradrachms), and begin some years before the issue of the tetradrachms of his second coinage.

The whole series corresponds in several respects to the contemporary bronze coins assigned to Osroes, but it is difficult to assign it to Osroes himself. Is it the coinage of some other rival king of this period?

For convenience, I describe the series under "Volagases II?" It is important to note that these coins are the only evidence that the second coinage (and presumed 'restoration' to the throne) of Volagases II took place as early as year '423' (=A.D. 111/12): the tetradrachms indicate year '433' (=A.D. 121/22) as the date when his second coinage began.

MITHRADATES IV.¹			
<i>Second Century A.D. (1 circ. A.D. 130—circ. A.D. 147).</i>			
Drachms.			
Sizes .85—.75			
(a)			
		Bust of Mithradates IV 1., with long pointed beard and flowing hair; wears diadem, earring, spiral necklace, and cuirass: border of dots.	ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ. r. ΑΡ ΣΑΚΟΥ; in ex., ΕΥΕΡΓΕ ΤΟΝ ΔΙΚΑΙΟΝ, l. ΕΠΙΦΑΝ ΟΝΣ ΦΙΛΕΛΛΗΝΟΣ² Arsaces seated r. on throne, hold- ing bow; in front, Α
1	55.2		[Payne Knight bequest.]
Pl. XXXIII. 6.			
3	53.		
3	54.		[Cunningham.]
4	56.8		[Cunningham.]
Pl. XXXIII. 7.			

¹ The identification of this king is discussed in the Introduction, § 2, under 'Mithradates IV.' The portrait on classes (a) and (b) so closely resembles that on class (γ) that the attribution of (a) and (d) to the Mithradates named on the drachms of class (γ) seems almost certain. The attribution of the bronze coins is more open to doubt.

In style and epigraphy, the drachms belong to about the first half of the second century. The Γ. (or Γ.) form of Γ (in *εὐεργέτου*) probably first appears on the drachms of Pacorus II (third coinage, A.D. 92—96), and is found on the coins of his successors. In classes (a) and (b) the method of writing the Greek legend is the same as on the drachms of Osroes and of Volagases II. Class (γ), however, has some well-marked peculiarities, which are first found on the drachms of Volagases III (class α), notably the blunders in the spelling of *ἐπιφανούς* and *φιλέλληνας*; the form < (instead of Γ) as the equivalent of the initial Α in 'Αρσάκου; the appearance of a pellet on the reverse, above the bow.

² The inscription on series (a) is generally as follows:—**ΠΑΙ**
ΛΗΣ ΠΑΙΠΛΗ ΛΗΛΑΝΟΣ (or **ΛΗΛΑΝΟΣ**) **ΙΝΙΠΙ**
ΤΟ ΔΙΧΛΙΟΝ ΠΙΠΛΑΝΟΝΣ ΦΙΛΙΛΛΗΧΟΣ

Drachms.

Sizes 8—·7

Bust of Volagases IV facing; long pointed beard; hair arranged in large bunches; wears diadem, spiral necklace, and cuirass: border of dots.

ΛΥΙΧ ΙΘΥ[ΙC] (*Volgasi malka*) and a barbarous inscription intended to represent ΒΑΣΙΛΕΩΝ ΑΡCΑΚΟΝ ΕΥΕΡΓΕΤΟΝ ΔΙΚΑΙΟΝ ΕΠΙΦΑΝΟΝC ΦΙΛΕΛΛΗΝΟC³ Arsaces seated r. on throne, holding bow. In front of type, Λ [Cureton.]

Pl. XXXV. 9.

¹ Thus read by Gardner, p. 58, but the date is very obscure.

² Gardner (p. 58) mentions a coin in the Bank of England Collection of this Volagases dated year '519,' but the only coin of that date that came to the British Museum when the Bank Collection was presented in 1877, undoubtedly belongs to the next Volagases (see *infra*, Volagases V, year 519).

The tetradrachm of year '520,' assigned by Longpérier (*Cabinet Magnoncour*, no. 678; *Mémoires*, p. 152) to Volagases IV, would rather seem to be of Volagases V.

³ The legend is abbreviated, and more degraded than in the case of the drachms of Volagases III (Class β). Some words are off the flan. Each specimen has blunders of its own, such as the following:—ΙΛΙΛ=ΒΑΣΙΛΕΩΝ; ΙΙ=ΑΡCΑΚΟΝ ΛΥCΥΟ or ΙΥΠ=ΕΥΕΡΓΕΤΟΝ; <ΧΛΙ or <Χ·ΙΙΛΙ=ΕΠΙΦΑΝΟΝC.

Horse's head.—lxxi., lxxii.; Period of Mithradates I, 9; Artabanus I, 22; Mithradates II, 29, 32; Artabanus II, 41; Sinatruces, 44; Phraates

III, 47, 51; Mithradates III, 63; Orodes I, 71, 77, 86; Phraates IV, 132; Gotarzes, 175; Volagases I, 184; Mithradates IV, 222.

K.

Kantharos.—Phraates IV, 121; Artabanus III, 152.

Kantharos ? (or amphora).—Pacorus II, 196, 197.

King, bust or head of.—Gotarzes, 171; Uncertain, 252, 253.

King on horse.—Phraates, 138; Gotarzes, 172.

King on horse, and Tyche.—Artabanus III, 148, 149.

King on horse, Tyche and Parthian with diadem?—lvi.; Pacorus II, 195, 197, 198.

King sacrificing.—Gotarzes, 172.

King seated, holding bow and sceptro.—Phraates IV, 108; Orodes II, 142.

King seated, holding Nike.—Orodes I, 73; Phraates IV, 100-102.

King seated on rock (?), holding palm-branch.—Gotarzes, 174.

King seated on throne, holding palm-branch.—Gotarzes, 173.

King seated, holding eagle, crowned by Tyche.—Phraates III, 48.

King seated, receiving diadem from Athena.—Phraates IV, 105, 106.

King seated, receiving diadem from Tyche.—lxx.; Phraates IV, 99, 103, 104; Phraates, 136; Gotarzes, 161-164; Volagases I, 178-182; Pacorus II, 193, 194, 198 n., 200; Artabanus IV, 203; Volagases II, 209-213; Volagases III, 224-229; Volagases IV, 237-239; Volagases V, 241-243; Artavasdes, 251 n.

King seated, receiving diadem from kneeling Parthian.—Artabanus III, 147, 148.

King seated, receiving palm-branch from Tyche.—Orodes I, 72, 73; Phraates

IV, 99-107, 109; Tiridates II, 135; Artabanus III, 146-148; Vardanes I, 153-156; Volagases I, 185-186.
King seated, and Tyche kneeling.—Orodes I, 72; Phraates IV, 100 n., 101.

L.

Leaf-ornament and rosette (on cuirass).—Orodes I, 72.

M.

Male bust.—Uncertain, 253.
Male figure sacrificing.—Volagases I, 187, 188.
Mithradates⁺ I (?), bust of.—xxvi.—xxviii.; Period of Mithradates I, 6-15.
* Mithradates II, bust of.—lxxv.; Mithradates II, 24-37.
Mithradates III, bust of.—61-67.
Mithradates IV, bust of.—217-223.
Musa, bust of.—xl.; Phraataces and Musa, 139-141.

N.

Necklace.—lxxv.; with griffin ornament, Orodes I, 73; with half-horse ornament, 25, 26, &c.; with

Nike in biga.—lxii. n.; period of Mithradates I, 8.

Nike, held by Demeter.—Period of Mithradates I, 10; Artabanus I, 20; Himerus, 23.

Nike held by king.—Orodes I, 73; Phraates IV, 100-102.

Nike crowning head of king.—Unknown king, 60; Orodes I, 68, 69; Pacorus I, 97, 98; Phraates IV, 131, 132; Phraataces and Musa, 139; Artabanus III, 147, 148.

Nike, two figures of, crowning king's head.—Phraataces, 137-141.

O.

Omphalos.—xxiv.; lxvii., lxix.

Orodes I, bust of.—xxxvi., xxxvii., lxxv.; 68-96.

Orodes II, bust of.—xlii.; 142.

Osroes, bust of.—lvii.; 204-208.

P.

Pacorus I, bust of.—xxxvii.; Pacorus I, 97, 98.

Pacorus II, bust of.—lvii.; Pacorus II, 193-202.

Parthian kneeling, offering diadem to

Phraates IV, bust of.—Phraates IV, 99-134.

Pomegranate.—Gotarzes, 177.

"Prow,"—lxxiii. n.

Q.

Queen, bust of.—Gotarzes, 172.

R.

Rosette.—See leaf-ornament and rosetto.

S.

Sacrificer at altar.—Volagases I, 187, 188.

Sheep, horned, forepart of.—Artabanus V, 230.

Sheep, horned, reclining.—Mithradates IV, 223; Artabanus V, 249, 250.

Sheep, horned, standing.—Phraates IV, 119.

Sphinx.—Phraates IV, 124, 125.

Spray, triple, on helmet.—lxxvi. n.; Phraates III?, 54, 55.

Stag.—lxxii., lxxvi.

Stag feeding.—Phraates IV, 129.

Stag standing.—Orodes I, 77; Phraates IV, 119.

Stag's head.—Orodes I, 78.

Stag's horn on helmet.—200 n.; lxxvi.

Stags, foreparts of, on helmet.—lxxvi.; 48, 54, &c.

Star.—Orodes I, 95; (on cuirass), Mithradates II, 27; Sinatrucos, 44; Phraates III, 45, &c.; Unknown King, 59; Phraates IV, 103, &c.; Phraatacos, 137; Vardanes I, 155, &c.; Gotarzes, 163, &c.

Star and crescent.—See Crescent and star.

Star and eagle (on cuirass).—Phraates IV, 101.

Star and griffin (on cuirass).—Phraates IV, 99, &c.

Star and letter.—Vardanes I, 153, &c.; Gotarzes, 161, &c.

Star and Nike (on cuirass).—Phraates IV, 100, &c.

T.

Terminal figure.—Phraates IV, 122.

Throne.—xxiv.; lviii.; lxix.

Tiridates II(?), bust of.—Tiridates II, 135.

Triform face.—See Hekate.

Tyche, bust or head of.—xlvi.; lxxii.; Orodes I, 82, 93; Phraates IV, 117, 128, 129, 131; Artabanus III, 151; Gotarzes, 170, 171; Pacorus II, 196, 198, 199, 202; Osroes, 204-207; Volagases II(?), 216; Volagases III, 233, 234.

Tyche, half-length.—Gotarzes, 169.

Tyche, three-quarter length.—Gotarzes, 170.

Tyche seated, holding cornucopias, &c.—Volagases III, 234.

Tyche seated on column.—Volagases II(?), 215, 216; Volagases III, 232, 233.

Tyche (?) seated, r. hand extended.—Phraatacos, 139.

Tyche standing between two columns.—liii.; Volagases I, 183, 184.

Tyche standing, holding cornucopias and rudder.—Phraates IV, 133.

Tyche standing, holding palm-branch and sceptre.—Osroes, 208.

Tyche standing, holding wreath.—Orodes I, 81.

Tyche(?), standing, sacrificing.—Phraatacos, 138.

Tyche crowning seated king.—lxx.; Phraates III, 48.

Tyche kneeling before king.—Orodes I, 72; Phraates IV, 100 n., 101.

Tyche offering diadem to king. See 'King seated, receiving diadem from Tyche.'

Tyche offering palm-branch to king.—

See 'King seated, receiving palm-branch from Tyche.'

Tyche, and king on horse.—Artabanus III, 148, 149.

Tyche, king on horse and Parthian with diadem?—lvi.; Pacorus II, 195, 197, 198.

Tyche of City.—See Tyche.

U.

Unknown King, bust of.—Unknown King, 56-60.

V.

Vardanes I, bust of.—Vardanes I, 153-160.

Vardanes II, bust of.—Vardanes II, 190-192.

Volagases I, bust or head of.—Volagases I, 178-189.

Volagases II, bust of.—Volagases II, 209-214.

Volagases II(?), bust of.—Volagases II(?), 215, 216.

Volagases III, bust of.—Volagases III, 224-236.

Volagases IV, bust of.—Volagases IV, 237-240.

Volagases V, bust or head of.—Vola-

W.

Wart on forehead.—xlvi., lli. n.; lxxvi.

Wheel-like device.—Volagases III, 235.

Wreath.—Gotarzes, 177.

Wreath (or diadem).—lxxi.

Wreath encircling type.—Gotarzes, 175; Volagases III, 236.

Z.

Zens seated, holding eagle.—Period of Mithradates I, 13-15.

Zens(?) standing in shrine.—Vardanes, II, 191, 192.

𐎧.—lxxxv.

𐎧.—Phraates IV, 119.

𐎧.—Vonones I, 145.

𐎧.—lxxiii.; Phraates IV, 133; Volagases I, 188, 189; Volagases III, 236.

𐎧.—Phraates IV, 134.

𐎧 on helmet.—Volagases II?, 216.

INDEX IV.

SYMBOLS AND ADJUNCTS.

A.

Altar (?).—Phraates IV, 127.
Anchor.—lxxvi., lxxxvi.; Phraates III?, 54, 55; Orodes I, 88, 89-92.

B.

Branch?—Mithradates III, 27.

C.

Caduceus.—Phraates IV, 122; Oaroos, 207.
Cornucopias.—Artabanus III, 148.
Crescent.—Orodes I, 79-82; Pacorus I, 97; Phraates IV, 99-101, 113, 116, 125-127; Volagases I, 187, 188; Pacorus II, 194; Artabanus IV, 203; Mithradates IV, 220; Volagases V, 243; Uncertain, 253.
Crescent and star.—lxxii., lxxxvi.; Mithradates III, 66; Orodes I, 82-89; Phraates IV, 117, 126-130, 132; Gotarzes, 167.
Crescent and two stars.—Orodes I, 90-95.

E.

Eagle.—Phraates IV, 125-126.
Eagle with wreath.—Phraates IV, 111, 113.
Eagle with wreath, crowning king.—xl., lxxii., lxxxvi.; Phraates IV, 110-127.

N.

Nike crowning head of king.—See Index III. under "Nike."

P.

Palm-branch.—lxxxiii.; Mithradates II, 24; Orodes I, 95; Phraates IV, 113, 119; Vardanes I, 160; Volagases III, 232, 233.
Pellet.—Phraates IV, 101, 105, 106; Tiridates II?, 135; Phraates, 136; Mithradates IV, 220; Volagases III, 230, 231.
Pellets, three.—Orodes I, 85.

S.

Star.—Mithradates III, 66, 67; Phraates IV, 111, 117, 121-125, 127, 129, 130, 132.
Star and crescent.—See Crescent and star.
Stars, two.—Vardanes II, 190, 191.
Stars, two, and Crescent.—Orodes I, 90-95.

T.

Torch?—Early Coinage, 4.

W.

Wreath.—Gotarzes, 174; Mithradates IV, 221,

—Gotarzes, 177.

INDEX V.

COUNTERMARKS.

C.

Caduceus ?—Orodes I, 88.

H.

Head in helmet.—Phraates IV, 114.

TABLE A.

LIST OF PARTHIAN KINGS, WITH DATES.¹

ARSACES, the Founder†	B.C. 250—248
TIRIDATES I	248/7—211/10
ARSACES, son of TIRIDATES I	210—191
PHRIAPATIUS	191—176
PHRAATES I	176—171
MITHRADATES I	171—138
PHRAATES II	138—128/7
ARTABANUS I	128/7—123
HIMERUS †	124—123
MITHRADATES II	123—88
ARTABANUS II	88—77
SINATRUCES	77—70
PHRAATES III	70—57
UNKNOWN KING (p. xxxiv., <i>supra</i>)	before <i>circ.</i> B.C. 57
MITHRADATES III	57—54
ORODES I	57—38/37
PACORUS I (cp. p. xxxvii., <i>supra</i>)	<i>d.</i> B.C. 38
PHRAATES IV ²	B.C. 38/37—3/2
TIRIDATES II†	B.C. 26
PHRAATACES (and MUSA)	B.C. 3/2—A.D. 4
ORODES II	A.D. 4?—A.D. 6?

¹ The material in Gutschmid's *Geschichte Iran* supplies the basis for this Table. Such modifications as have been introduced are chiefly suggested by the numismatic evidence as set forth in this *Catalogue* and discussed in the Introduction, *supra*.

² A Mithradates may have been a rival king of Parthia in B.C. 12—9. See Introduction, *supra*, p. lxxviii.

VONONES I	A.D. 8/9—11/12
ARTABANUS III	10/11—40
TIRIDATES III (p. xliv., <i>supra</i>)	36
CINNAMUS (p. xliv., <i>supra</i> ¹)	after circ. A.D. 37
VARDANES I	41/42—45
GOTARZES	40/41—51
VONONES II	51
MEHRDATES (p. xlvii., <i>supra</i>)	49—50
VOLAGASES I	51—77/78
VARDANES II	55
PACORUS II	77/78—109/110
ARTABANUS IV	80/81
OSROES	106/07 (or 109/10)—130
PARTHAMASPATES (p. lviii., <i>supra</i>)	117
VOLAGASES II	77/78—146/47
MITHRADATES IV	? circ. 130—147
VOLAGASES III	147/48—191
VOLAGASES IV	191—207/08
VOLAGASES V	207/08—221/22
ARTABANUS V	circ. 213—227
ARTAVASDES	circ. 227/28

¹ Cp. Clinton, *Fast. Rom.*, ii., p. 247.
